

Overview

I collaborate with families, schools, medical providers, and community partners to support the educational needs of children with disabilities and complex health needs. Whether a child attends a public, charter, or private school, I work to ensure that educational plans are aligned with individual learning needs.

What Sets Me Apart

What makes my services different is the level of **personalization, presence, and partnership** I bring to every case. I don't just consult from a distance — I work *with* you, side by side.

Here's how I stand out:

- **In-person support:** I can attend IEP or 504 Plan meetings in person, offering direct advocacy and collaboration.
- **Tailored materials:** I create personalized resources and documentation to meet the unique needs of each student and team.
- **Team-based recommendations:** I offer thoughtful suggestions for team members to consider—always aligned with student strengths, needs, and family input.

- **Stakeholder collaboration:** With family consent, I connect and communicate with medical teams, therapists, school staff, and other community partners to ensure consistent support.
- **Restoring trust:** When school-family relationships have been strained, I help rebuild communication, trust, and shared purpose — so everyone can refocus on what matters most: the student.

Speak Up for
Education
Consulting, LLC
