Benefits

- Provides 6 Billion CFUs of healthy bacteria to support your digestive system
- Restores your gut flora with healthy bacteria
- Support for optimal digestion
- Maintain or support digestion or assimilation of nutrients

PROBIO

Science

THE SCIENCE BEHIND SMART PROBIOTICS

ProBio delivers 6 Billion CFUs of healthy bacteria and each strain of bacteria has a unique benefit. Probiotics are measured in Colony Forming Units (CFU), which is a measurement of healthy live bacteria. Using a broad array of probiotic strains provides you with a spectrum of benefits for your gut. More is not always better—especially when it comes to probiotics. Having a balanced amount of probiotics that are alive when they arrive in your gut is more important than the quantity you ingest. That's why LifeVantage ProBio uses controlled-release technology to deliver live probiotics deep into your small and large intestine.

Probiotic Strains—(Lactobacillus rhamnosus, Lactobacillus paracasei, Lactobacillus acidophilus, Bifidobacterium lactis)—Healthy probiotic strains to help support healthy digestion.

Directions

↓
Adults take one (1) capsule daily,
preferably with food.
◆

*The 6 billion CFU is at time of manufacture.
