INVIGORATING SHAMPOO

EXPECT MORE OUT OF YOUR SHAMPOO.

Life is already filled with too many choices. That's why we created a shampoo that doesn't make you choose. Good for your hair. Good for the environment. It cleanses with a safe formula and invigorates with peppermint oil. TrueScience Invigorating Shampoo is formulated with Nrf2 ingredients and a blend of amino acids to eliminate hair frizz and strengthen each strand of hair. By selecting mild surfactants that create a gentle lather, you will get cleaner, healthier-looking hair without having to compromise.

Product Info

When we created TrueScience Invigorating shampoo, we wanted to give biohackers something better. A shampoo that didn't force them to choose between safe and effective. One that's scientifically formulated, and works hard to care for their hair the same way they care for their bodies. TrueScience Invigorating Shampoo is built on a simple philosophy: that less is more. Fewer chemicals and a clean formula that reduces toxic burden, and more

results for healthier looking hair. It starts with clean ingredients mindfully formulated with Nrf2 ingredients that strengthens each strand of hair, removing excess oil and dirt, while reducing frizz. The result is a shampoo that protects against hair damage caused by environmental assaults, and gives you stronger and healthier-looking hair that shines. Oh, and did we mention this shampoo is as good for your hair as it is for the environment? Well it is.

Benefits

REMOVES

excess oil, dirt, pollution, and styling products without harsh detergents

REDUCES

hair frizz

KEEPS

hair soft and smooth

98.9%
