Dear Gurtej ji,

Thank you for your mail and I appreciate your interest and efforts through your strategies to follow during this corona pandemic. Several of your ideas are floating in the experts groups. Ministry of Health and Family Welfare. I believe your ideas can be conveyed to them. You could also reach to State Governments to assist them in controlling the spread of virus. You may write down to following officials :

Mrs. Arti Ahuja, Additional Secretary, Ministry of Health & Family Welfare, email : ash-mohfw@nic.in
Shri Balram Bhargava, Director General, Indian Council of Medical Research, email : secy-dg@icmr.gov.in

Best wishes,
Dammu Ravi
OSD(Europe & Covid19)
Ministry of External Affairs
New Delhi

Subject: CONFIDENTIAL - Appreciations to the Indian by the Government of Canada, America and Australia

Good morning.

This is to bring into kind notice of respected Ministry of External Affairs in India that since May, 2020 our Corona related strategies have been appreciated and implemented by the Canadian Government in Canada.

Apart from that we have also got appreciations for our strategies cum technology related Corona pandemic from **Australia, American and Canada Governments and Gates philanthropy partners.**

But the greatest satisfaction was to serve our Indian people as **we as we did with Maharashtra Government** regarding our strategy regarding Dharavai Crises in June, 2020.

Impact of our strategies and technologies on the World

Canadian Government

@ Strategy related to establishment of testing centres, shelters and arrangement of doctors have been **implemented by the Canadian Government in the rural parts of Canada** in May, 2020 and according to the **Canadian Ministry they have got relief from it against Corona pandemic.**

@ **Strategic Policy Branch, Health Canada** shared our strategy for the promotion of convalescent plasma donation in Canada with the Canadian blood system operators as well as the provinces and territories with their good wishes for our efforts to promote the health and welfare of Canadians and people around the world during the Corona unprecedented time.

@ **Strategy related to convert railway coaches into hospitals in the rural areas** for the potential use during the COVID-19 pandemic and any future health crises have been forwarded recently by the **Canadian PMO office and Brunswick Government** to their concerned ministries for their kind consideration.

All our strategies were initially aimed for taking health care facilities to the remotest part of the world which were little bit modified for Corona pandemic have been motivated by the appreciation from **Ministry of Education, Saskatchewan, Canada in 2019** for our thoughtful perspective **and strategy to improve the economy of Saskatchewan through education and to take the education up to the remotest part of the world.**

Indian Government

We have got the orders for necessary action by **the Honorable Chief Secretary, Maharashtra Government** for our strategy related to **Dharavai Crisis** to arrange doctors and hospitals with technology in Mumbai to save millions of lives during the Corona pandemic.

Dharavai, as we know is **the world's biggest slum area** and **WHO** themselves have shown their great concern and worry to the world to control the spread of Corona in Dharavai.

California Government, America: State of California

The State of California has kept our technology to save the lives of Indigenous communities and native tribes of California from COVID-19 pandemic on file for future **for potential future technology needs.**

Australian Government: National Indigenous Australian Agency

National Indigenous Australian Agency has addressed us as a 'Lead agency' for his proposal **to use technology to save lives in remote Australian Indigenous communities** from COVID-19 apart from appreciation for his concern for Indigenous communities and their access to health services.

Without coming on media for our achievements, we have been putting all into our Indian Government notice with our strategies related to Corona pandemic since April, 2020 and even to our respected PMO office on 17th June, 2020 through email via appt.pmo@gov.in .

But, am sorry may be due to lack of official staff during lockdown in India in various phases, we assume **our Corona related strategies and our foreign achievements have never reached up to our respected Honorable Prime Minister Modi Ji.**

Immediate Humble Attention Please

Now, we are ready with our latest strategy that would not only India but world out of Corona pandemic from the current worst scenario with immediate effect.

We have also informed the National Disaster Management headed by our respected Prime Minister Modi ji about the same on 25th April, 2021 but unfortunately there is sudden lockdown in New Delhi in that week itself and we assume our strategy have been struck up again in pipeline and never have reached up to our respected Prime Minister Modi Ji.

We therefore humbly request you to kindly guide us the medium where we can share our latest Corona pandemic strategy which totally fits into our current India worst scenario with assurance from your side that it reaches directly in the hands of our Indian Prime Minister Modi Ji as soon as possible because we are sure it can save millions of lives in India with immediate effect and am sorry it may be life of any mine or your relative and well-wisher in India.

Thank you so much for your immediate attention and response to our humble request for humanity.

PROUD TO BE INDIAN
