Solaclad™ premium cool coatings are made of a PVDF coating containing 70% Kynar 500® or Hylar 5000® resin to ensure long-term color retention and performance without peeling, fading or chalking. The coating is applied in a controlled environment over a high-quality primer and permanently bonded under high heat to commercial quality Galvalume® steel or 3000-H24 series aluminum coil.

Kynar 500® is a registered trademark of Arkema, inc. Hylar 5000® is a registered trademark of Solvay Solexis, Inc. Galvalume® is a registered trademark of BIEC International, inc., among others.

Colors shown are as close to actual colors as allowed by the printing process. For actual metal samples, please contact your Sabre Metals representative.
