

# DELAWARE COMMUNITY COMPOSTING INITIATIVE

## EXPANSION PROGRAM

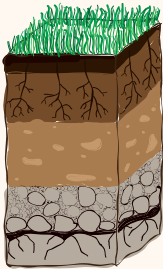

### Establish a community composting sites in De communities

- Site Members collect their kitchen scraps to be used for making compost, a soil enrichment
- This reduces landfill waste, sequesters CO<sub>2</sub>, creates a circular economy and builds community

### What DCCI provides:

- Training for compost site leaders and members
- Materials and supplies to build the compost site
- Project management
- Guidance through permitting and other processes

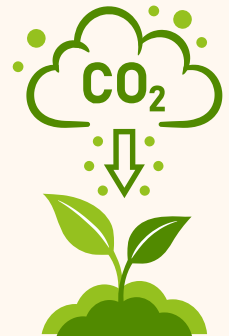

### How to qualify:

- Open to communities, schools, and organizations
- Attend a DCCI Program virtual info session
- At least 2 leaders that commit to the project
- Ability to show there is community interest
- Gain approval for use of property/land
- Submit a DCCI application form

### Next Steps:

- Connect with [DCCI@PlasticFreeDelaware.org](mailto:DCCI@PlasticFreeDelaware.org)
- Get questions answered to ensure your project qualifies
- Visit [www.plasticfreedelaware.org/DCCI-Expansion](http://www.plasticfreedelaware.org/DCCI-Expansion) for details and to apply

### Benefits of Community Composting:

Community composting provides environmental, social, and economic benefits including community empowerment, education, revitalization, climate resilience, job training, and more!
