- Manufactured according to FDA Monograph for Eye Wash (has a preservative)
- Three year shelf life

Formula; a preserved, buffered, isotonic, sterile eyewash solution.

The active ingredient is purified water. The solution is buffered to achieve and maintain the same pH levels as tears. Tonicity agents have been added to establish isotonicity with tears. Contains a reliable preservative agent.

Eys single use application eyewash products are manufactured in the USA and are compliant with U.S. FDA Monograph for eyewash.

EyS-1.....0.5fl.oz (15ml)
