# **JET STYLES**

Designed and built exclusively for QCA Spas, jets are positioned for optimum performance. Settings range from power surge, which creates a lively swirling action to a high-power flow narrow which delivers a narrow stream for more intense therapy targeting specific areas of your body.

### **QCA SPAS FEATURES**

# PATENTED DURA-BOND™

This multi-layered, patented strengthening process combines the beauty of Lucite Plus Acrylic" with a layer of ABS for shell strength and integrity. Then a double strengthening material is applied. This high density material has all the strengthening properties of fiberglass without the environmental concerns.

# SHELL STRENGTHENING SYSTEM

- Acrylic Plus™
- 2. ABS
- 3. Dura-Bond™ with Foam Insulation
- 4. Polyethylene Foam
- Maintenance-Free Weather Guard™ Cabinet
   Polystyrene Insulation
- 7. Radiant Foil Insulation
- 8. Thermal Air Barrier
- Moisture-Resistant Polyethylene Flooring

#### **QCA'S OZONE SYSTEM**

Ozone is a safe, convenient, low cost way to clean your spa water. It is a natural purifier that aids in eliminating bacteria, viruses, mold & mildew. It helps remove minerals while using fewer sanitizing water care products. All QCA Spas come equipped with the QCA's Ozone System Natural Water Sanitizing System.

# **ENERGY SAVER SYSTEM**

Heat is generated by the spa's power equipment inside the cabinet. This heated air is captured and returned to the spas water. This continually helps maintain the water temperature without running the heater as often. This heat recovery system saves you money in electrical cost and helps save our planet.
