PREVEIL + White Raven SECURITY

SAME SBC 2026
Small Business Conference for the A/E/C Industry
November 4–6, 2026

BETTER TOGETHER

From gap analysis to CMMC certification, one team for federal A/E/C firms

White Raven Security gets your program ready. PreVeil secures the CUI your team emails and shares every day. Together, you walk into your assessment with evidence, not guesswork.

Your drawings are CUI. Your contracts now say so.

Design drawings, specifications, and facility control system data for USACE, NAVFAC, and AFCEC projects are often Controlled Unclassified Information (CUI). Primes are already asking subs to prove they protect it.

Most A/E/C firms still share that data over everyday email and consumer file links — the first thing an assessor will flag.

100+
PreVeil customers achieved CMMC with perfect scores

60+
DIB companies prepared for CMMC by White Raven

Meet Lori Jackson, CISSP
President, White Raven Security
Lead CMMC Certified Assessor (LCCA)

Find us at Booth #1341!

Two specialists. One path to compliance.

WHITE RAVEN SECURITY

- Advisors with 25 years of experience working with the Defense Industrial Base
- NIST SP 800-171 gap analysis and CMMC readiness assessments
- System Security Plans, policies, and incident response planning
- Aerie GRC platform to track progress control by control

PREVEIL

- End-to-end encrypted email and file sharing for CUI
- Works in Outlook, Gmail, Windows Explorer, and Mac Finder
- Runs alongside Microsoft 365 or Google Workspace — no migration
- Assessment-ready documentation for all 110 CMMC controls

How we work together

1. **Assess.** White Raven maps your current state against NIST SP 800-171 and scopes where CUI lives.
2. **Secure.** PreVeil deploys in under an hour, so CUI moves only through an encrypted enclave your team already knows how to use.
3. **110 Ready.** White Raven closes remaining gaps and helps organize the evidence needed to prove you meet all 110 controls.

> **"It was over $200,000 for 33 users... the PreVeil quote was 1/10th of that."**
>
> PreVeil customer, U.S. defense contractor, comparing PreVeil to a Microsoft GCC High quote
