Superior Sidewall Strength

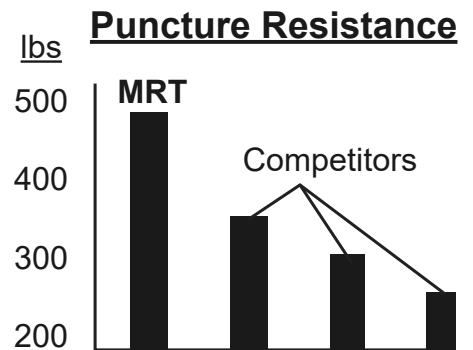

Superior Sidewall Strength through MRT's Continuous Improvement Program:

MRT knows the importance of quality and demonstrates this through every step of manufacturing. By testing, and gaining critical user feedback, MRT refines every step of the process to deliver the best of breed tire. The best anti-puncture, the best strength, the best performance in all terrain. MRT owns specialized tooling at certified US test labs to test anti-puncture, measuring strength of sidewall and affects of sidewall impacts.

MRT engineers use these tests along with the analysis of all flats / punctures to develop tires that now exceed 3X stronger than the competition! And we are not stopping there. We back our tires with our Continuous Improvement Program (CIP).

Quality When You Need It! MRT delivers!

www.motoracetire.com/mrt-continuous-improvement-program/

KEVLAR - Aramid/Kevlar is an organic fiber, best suited for applications where toughness is preferred. These fibers offer high strength, low weight, desired stiffness and thermal stability, and are 43% lighter than fiberglass, twice as strong as E-glass, and ten times as strong as aluminum.

These unique properties make it an exceptional fiber for use in MRT tires!

Experience drives results and quality. It's this experience and years of racing and testing, that led MRT to develop its own proprietary blend of rubber using different levels and types of carbon, real rubber and synthetic rubber. The result is the MRT SS-RUBBER sticky tires! "Sticky compound that wears!"

"STICKY COMPOUND THAT WEARS"

**PODIUM PROVEN
UTV RACE TIRES!**

MRT SUPER STICKY (SS) COMPOUND

MRT SS-RUBBER compound is designed for all race conditions, by racers! Proven to be the best UTV Race Tires on and off road.

Sticky Compound That Wears

RALLY SNAKE SHORT COURSE

- ★ Ultra 4 Series Champion Tire, 3 years running
- ★ Smaller tread lug height and dual durometer gives this high-speed tire added rigidity and lateral stability when cornering
- ★ 16 mm tread depth, unique tread lug design excels in hard-packed fast terrain
- ★ RUN FLAT 20-50 miles depending on load
- ★ Aggressive tread in all-terrain & conditions

XROX-DD/XG DUAL DUROMETER

- ★ Taller tread lug height dual-duro construction
- ★ Perfect balance high-speed performance, durability and flex in order to grip slick rock
- ★ 20MM tread depth: XG has a deeper Lug for better ROCK and MUD traction
- ★ Reinforced apex bead prevents bead pinch flats and provides a stronger seal for low pressure riding
- ★ Flat tread profile for larger traction patch makes steering more predictable
- ★ Deep square tread extra grip in all-terrain

**MADE FOR THE
TOUGHEST TERRAIN**

TESTIMONIALS

"I wouldn't be able to do it without my MRT tires allowing me to hookup and pass people. They are amazing tires and would recommend them to everyone!"

Andrew Fausone

**Phil Cagliero 1st place finish
at the Ultra 4, 2016 and 2017**

"Bad ass tire. Makes the strongest most durable tire available. All I run. If you want the toughest tire out this is it."

Anthony Yount

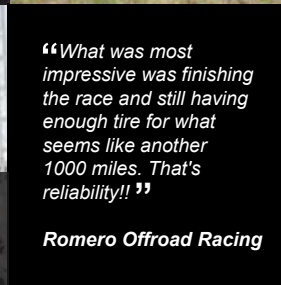

"MRT sells the best tires on the UTV Tire Market! Have been hitting the podium ever since I put these bad boys on."

Brandon Bryant

**Romero Offroad finishes the
Baja 1000, no spare required**

"What was most impressive was finishing the race and still having enough tire for what seems like another 1000 miles. That's reliability!!"

Romero Offroad Racing

"We ran the entire King of the Hammers on the original 4 tires we started with, no balls, no blocks, no B.S. just the best tires you can run period!"

Mark Shea

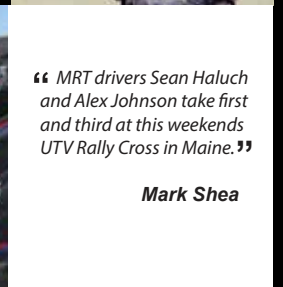

**Paul Hart 1st place finish
at the Metal Cloak Stampede**

"MRT tires will be a huge part of this event and getting us to the finish line. Best tire hands down. Thank you for being such a great sponsor."

Renee A Fuscardo-Hudson

"MRT drivers Sean Haluch and Alex Johnson take first and third at this weekends UTV Rally Cross in Maine."

Mark Shea

"These tires are only for those who need a tire that is very hard to flat and will run flat. In 2 seasons I ripped one sidewalk out at The Mint 400 and ran 20 mi at near race speed."

George Felix

"Quality When You Need It!"

Experience drives results and quality. It's this experience and years of racing and testing, that led MRT to develop its own proprietary blend of rubber using different levels and types of carbon, real rubber and synthetic rubber. The result is the MRT SS-RUBBER sticky tires! "Sticky compound that wears!"

PODIUM PROVEN UTV RACE TIRES!

MRT SUPER STICKY (SS) COMPOUND

MRT SS-RUBBER compound is designed for all race conditions, by racers! Proven to be the best UTV Race Tires on and off road.
