

# Process, Product, Equipment & Software Validations

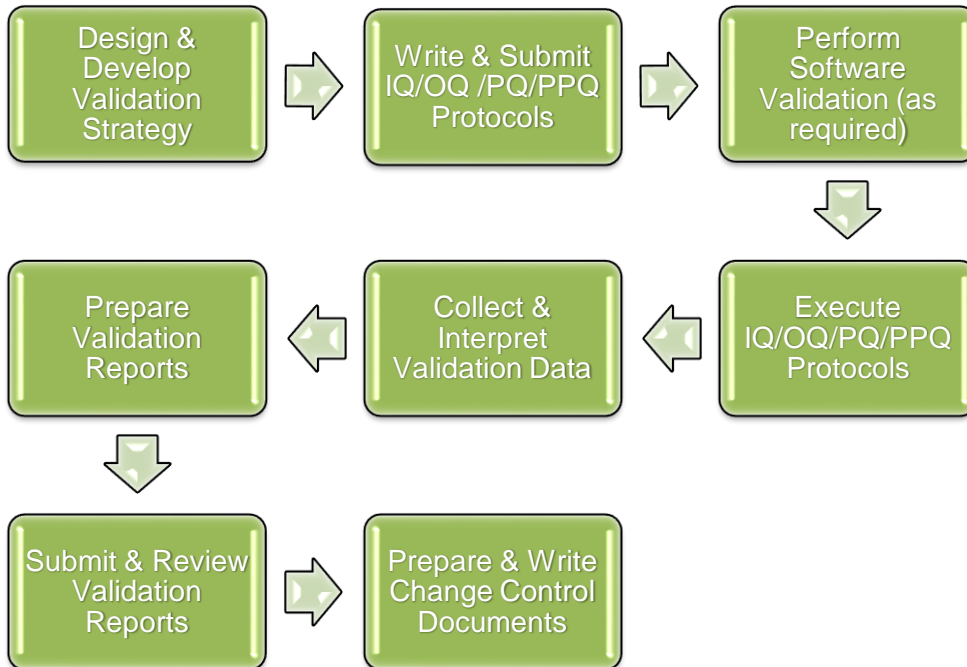

Caraballo Consulting focuses on understanding your needs and providing you with exceptional consulting resources. We will find the right level of experience for the task at hand to ensure innovative and cost effective consulting solutions.

Our consultants are well versed in the latest validation methods, industry standards and regulations to help clients successfully comply with current Quality System Regulations (QSR). We provide Equipment & Software Validation services, including protocol generation and implementation:

- IQ (Installation Qualification)
- OQ (Operation Qualification)
- PQ (Performance Qualification)
- PPQ (Process Performance Qualification)
- CSV (Computer Systems Validation)

Our consultants are considered Subject Matter Experts (SMEs) in their respective fields and combine extensive training as well as best practices learned from working in state of the art manufacturing plants with years of on-site experience. We bring excellence and experience to the table while getting the job done in a timely and cost effective manner.

## Process, Product, Equipment & Software Validation Methodology
