Who We Are

Astrala Advisory Services is a Cyprus-headquartered AI research, technology development, and IT digital infrastructure partner for international professional services firms. Based in Paphos and registered as a Cyprus company (HE 480652), we deliver finance operations, IT infrastructure, and proprietary talent technology to construction, engineering, consulting, and recruitment businesses operating across the EU, MENA, and beyond.

We exist because mid-market firms deserve the same operational rigour and technology advantage that large enterprises take for granted — without the overhead. Our clients gain a single, accountable partner for their back-office operations, underpinned by technology we build ourselves.

The creators of the Astrala ecosystem bring a combined 75+ years of construction and civil engineering recruitment experience — the platform was designed by people who understand the industry from the inside.

Our Approach

1

Cyprus First, Globally Connected

Headquartered in Paphos, Cyprus with EU substance and reach into MENA and international markets. We lead from Cyprus — not from a satellite office.

2

Outcome-Driven

We measure ourselves on results our clients can see: 99.8% payroll accuracy, management accounts delivered by the 10th of every month, and SLA-backed response times across every engagement.

3

Technology We Build, Not Buy

Astrala Nexus is powered by proprietary technology built and continuously developed by Astrala Advisory — not a resold third-party tool. Grounded in peer-reviewed research led by Clara Futura & Astrala Research.

4

Single Point of Accountability

One partner, one relationship, one team responsible for finance, IT, and talent technology. No finger-pointing between vendors. Full visibility from Day One.

Our Services

Financial Operations

- Multi-currency payroll across EU and MENA jurisdictions
- Credit control and cash-flow management
- Management accounts delivered by the 10th of each month
- Regulatory compliance and reporting
- Cost efficiency analysis and operational improvement
- Accounts payable/receivable, bank reconciliation

IT Infrastructure & Operations

- Microsoft 365 deployment and administration
- CRM implementation and optimisation
- VPN, firewall, and cybersecurity frameworks
- Multi-jurisdiction IT compliance
- Device management and endpoint security
- Technical support and help-desk services

Astrala Nexus — Talent Technology Platform

Astrala Nexus is the proprietary recruitment and talent management platform powered by technology built and continuously developed by Astrala Advisory. At its core is Clara — a conversational intelligence layer that combines natural language understanding with emotional awareness to deliver outcomes that go beyond traditional AI.

Coming Soon: Clara Nexus MVP2

The next evolution — an AI recruiter co-pilot that transforms Astrala Nexus into a high-volume hiring operations engine. Explainable, EQ-calibrated, human-in-the-loop.

→ Reduce routine coordination work by up to 80% while scaling to 100+ live vacancies

One partner. Three service lines. Measurable outcomes.

Meet the Team

Rachel Wilmot

Director

CIMA-qualified Management Accountant with a BA in Business Economics from the University of Leicester. Over 15 years of experience spanning SAP implementations, capital project accounting, Sarbanes-Oxley compliance, and financial systems transformation. Rachel provides strategic oversight and operational discipline across all client engagements.

Savva Savvas Poliviou

IT & Infrastructure Lead

PhD in Computer Engineering from Frederick University Cyprus with published research in AI and machine learning. CISCO-CCNA certified, IEEE and ETEK member. Savva leads IT infrastructure strategy, security frameworks, and technical platform architecture — including the development of Astrala Nexus.

Emily Spinks

Client Operations Leader

Experienced operations professional based in Paphos, with a London-based background in corporate office management, luxury hospitality, private membership services, and client-facing roles. Highly skilled in delivering high-touch service and providing effective, solutions-focused support.

Built for construction, engineering, consulting, and recruitment firms.

Why Astrala Advisory

Proprietary Technology

Astrala Nexus is powered by proprietary technology built and continuously developed by Astrala Advisory — not a resold third-party tool. The platform evolves with your needs.

Peer-Reviewed & Published

The full Astrala Nexus platform blueprint underwent rigorous peer review and was selected for publication in the Journal of Strategic Innovation and Sustainability (USA, 14–20% acceptance rate, May 2026). Research led by Clara Futura & Astrala Research.

Data Sovereignty

EU-hosted infrastructure with GDPR compliance by design. Role-based access with database-level controls. Client data stays within controlled jurisdictions.

EU Substance, Global Reach

Cyprus-headquartered with real operational presence. Serving clients across the EU, MENA, and international markets.

Operations. Technology. Trust.

Let's Talk

Whether you're scaling operations, solving recruitment challenges, or looking for a single accountable partner across finance, IT, and talent — we're ready.
