

EFFECTIVE LIQUID FILTRATION SOLUTIONS

GLASS FILTER MEDIA

Offers filtration as fine as 5-Microns

Glass filter media is manufactured from recycled glass.

Offers finer filtration than sand.

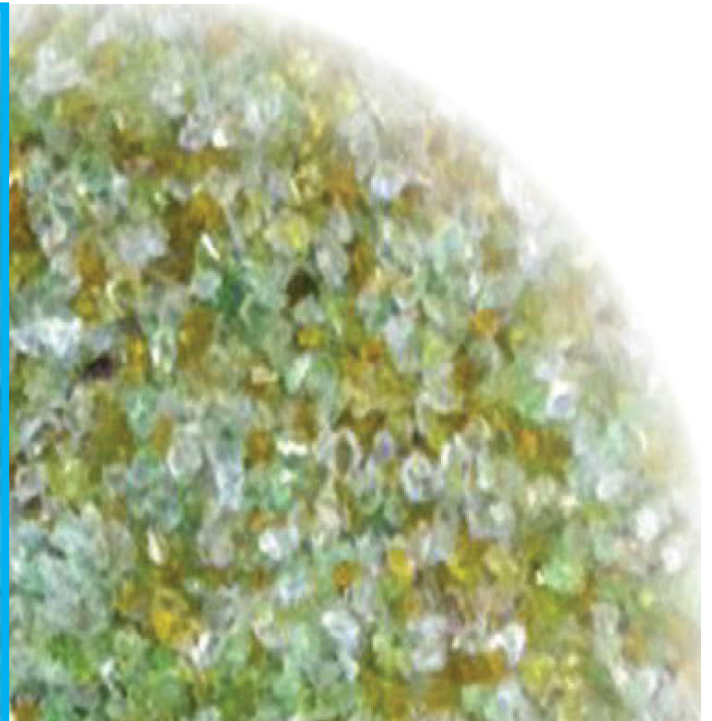

Glass filter media is chemically inert for superior purity and features crystalline free silica & heavy metals.

Raw material manufactured from 100% recycled glass.

Saves on flush water, energy and chemical treatment costs.

The heat—treated surfaces are smooth and resistant to bio-fouling.

Specialized heat treatment process, offers slower degradation.

Chemical Compositions

Silicon dioxide (SiO ₂)	73%
Sodium oxide (Na ₂ O)	13%
Calcium oxide (CaO)	10%
Crystalline Silica (c-Si)	< 1%
Aluminium oxide (AL ₂ O ₃)	< 2%
Magnesium oxide (MgO)	< 1%
Potassium oxide (K ₂ O)	< 1%
