

# HOW IS CBD MADE?

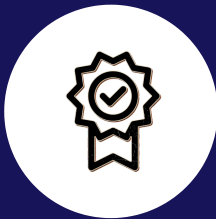

## STAGE 1: CULTIVATION

Organically grown hemp from one of our two farms is dried and cured to ensure optimal CBD concentration for you. We use no chemicals or pesticides and only organic fertilizers for the best and purist CBD.

## STAGE 2: EXTRACTION

Our non-GMO hemp then goes through an extensive ethanol (high grain alcohol) extraction which allows for the cleanest, highest quality CBD concentrate that is safe to produce and consume.

## STAGE 3: AUTHENTICATION

Our cannabinoid is sent to a third party testing lab in Colorado or Florida where a Certificate of Analysis (COA) is performed to ensure authenticity and quality of: ingredients, purity and potency of our Centered CBD products for you and your pets.

## STAGE 4: PRODUCTION

The pure cannabinoid is infused into our products in order to achieve the safest and fullest potential of your CBD experience anytime, anywhere. Centered CBD products include infusions, edibles, pills and even treats for your furry family members.
