

## Is It Legal?

---

The Hemp Farming Act of 2018 legalized industrial hemp that has a THC concentration of no more than 0.3% - Centered CBD adheres to this.

The Federal Controlled Substance Act clarified in the 2018 Farm Bill that CBD is and has never been a controlled substance.

On May 28, 2019, the USDA clarified that the Farm Bill provisions ensure cross-state transportation under a provision ensuring the “free flow of hemp in interstate commerce.”

CBD has not been evaluated by the FDA (other than Epidiolex) and legally we cannot claim that Centered CBD products treat, cure or prevent any disease, illness or ailment. You'll just have to try it for yourself.

CBD is still not legal in every state. If you're not sure, check your state laws - we can't bail you out of jail!
