

# DOSING GUIDELINES

## For PETS:

Your pet's Endocannabinoid System (ECS) is just like yours. Although the bioavailability for your pet may take longer through ingestibles, we think it's a kinder approach than the alternative. Your pet does not build a tolerance to CBD so there is no withdrawal or need to increase dosage. When you find the perfect dosage for your pet - stick with it!

Research demonstrates that CBD has anti-inflammatory properties, cardiac benefits, anti-nausea effects, appetite stimulation, anti-anxiety impact, as well as possible anti-cancer benefits for pets. So what are you waiting for?

Give our Purrfect Treats and WoofTreats a try!

Pet Weight Pounds	100 mg Broad Spectrum	100 mg Full Spectrum
0 - 10 lbs	1 mg Less than one treat	1 mg Less than one treat
