An easier way to choose the right mask

Choosing the right mask at setup is one of the most important parts of CPAP therapy success. ResMed mask categories make it easy to understand key benefits so you can select the mask that works best for you. Every ResMed mask is designed to deliver effective therapy and a comfortable night's sleep, but each mask category offers something a little different.

Minimalist category
Small. Light. Simple.

For many CPAP users, their primary driver for mask choice is simple: less mask on their face. This category features masks that are small, lightweight and easy to use. Minimal facial coverage is also appealing if you're claustrophobic.

AirFit™ F30   AirFit™ N30   AirFit™ P10

Freedom category
Sleep in any position.

This category features masks with a top-of-head tube connection, which keeps air tubing out of sight and out of the way. If you're an active sleeper, these masks help you comfortably move around at night and sleep in whichever position you choose, including your stomach.

AirFit™ F30i   AirFit™ N30i   AirFit™ P30i

Ultra Soft category
Patented memory foam offers unique comfort.

Mask discomfort is the number one reason CPAP users fall off therapy[1] and this category is designed to change that. With patented memory foam cushions, AirTouch™ masks deliver a unique level of comfort and softness.
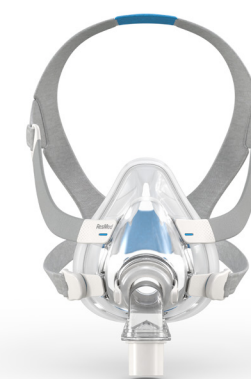

AirTouch™ F20   AirTouch™ N20

Universal Fit category
Classic designs that fit nearly every face.

Why are ResMed AirFit™ F20 and AirFit N20 our most popular full face and nasal masks? Most CPAP users find they just work for them. With a fit range of 97% for AirFit F20[2-4] and 99% for AirFit N20,[5] you can always choose one of these masks with confidence.
