# **Royal Root: Premium Coco Peat Products**

## **1. Grow Bags**

Pre-filled with premium coco peat, our grow bags offer a convenient, ready-to-use solution. Simply place the bag, make clean cuts for planting, and irrigate. Ideal for greenhouse cultivation of vegetables, flowers, and soft fruits, each bag supports optimal drainage and root aeration.

Available in various sizes to suit your crop requirements.

## **2. Coco Peat Briquettes**

Compact and easy to store, our compressed briquettes expand significantly when hydrated. Each briquette (approx. 20 x 10 x 5.5 cm) produces up to 8 litres of high-quality coco peat.

Options: Washed, buffered, or unwashed. Available with or without individual wrapping.

## **3. Coco Peat Bales**

Our 5kg compressed bales are ideal for larger-scale cultivation, soil enhancement, or retail purposes. With a moisture content under 25%, they are convenient to store and transport.

Customization Options:

Available in washed, unwashed, or buffered versions.

Packaging, size, and quality specifications can be adjusted to meet your requirements.

## **4. Weed Mats (Landscape Fabric)**

Made from natural coir, our biodegradable weed mats suppress weed growth while allowing air and water to penetrate the soil. They reduce maintenance, prevent erosion, and help retain soil moisture—ideal for horticulture, landscaping, and orchard management.

## **Royal Root: Premium Coco Peat Products**

### **5. Grow Cubes**

Perfect for propagation and seed starting, our coco peat grow cubes ensure high germination rates and minimise transplant shock. They provide excellent aeration and consistent moisture, promoting strong seedling development.

### **6. Coir Geotextiles**

Manufactured from 100% natural coconut fibre without synthetic additives, our geotextiles are designed for erosion control, soil stabilisation, and slope reinforcement. They support vegetation growth while preventing soil loss on embankments, roadsides, and landscaped areas.

### **7. Coco Peat & Fibre Discs/Pots**

These biodegradable planting discs and pots are made from a blend of coco peat and coconut chips. Excellent for nursery propagation, they offer superb moisture retention and aeration, encouraging robust root systems. They can be planted directly, reducing root disturbance, and are suitable for both indoor and outdoor use.
