

## Air Plant Care

### *Tillandsia*

Prefers bright, indirect light and temperature of 60 degrees and warmer. Keep away from cold drafts.

Watering methods:

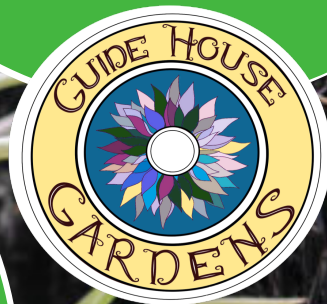

Terrariums - Mist the leaves 1-3 times weekly, wetting all leaf surfaces.

Free standing plants or those with thick or curly leaves. - Dunk the leaves in a dish of water or place under running water 1-3 times weekly.

Soak very dry plants by submerging in water 1-3 hours once a week, especially after a period of neglect.

SHAKE OFF ALL EXCESS WATER AND ALLOW TO DRY IN A WELL VENTILATED SPACE.

Fertilize 1-2 times monthly with water-soluble tillandsia or orchid fertilizer, following fertilizer package directions. If your plant is dry, soak it first then fertilize the next day.
