Zero Trust Implementation | Engineering
CISA ZERO TRUST MATURITY MODEL

- Delivered thorough architectural design, planning, analysis, and deployment services for multiple government agencies. Implemented rigorous processes and advanced technology that align with industry standards, utilizing CISA's strategic maturity model.

CyberSecurity Policy & Compliance Services

- CyberVault Solutions delivered cybersecurity policy and compliance support services engagement with a confidential client supporting federal initiatives. Our work included the development and documentation of Zero Trust policies, alignment with NIST SP 800-53A control families, and the enhancement of compliance efforts tied to DHS cybersecurity priorities and OMB mandates. This engagement focused on driving security modernization, improving control implementation, and ensuring policy frameworks met evolving federal requirements.

Table Top Exercises

- CyberVault Solutions has delivered tabletop exercises for multiple commercial clients, simulating threats such as phishing, ransomware, insider risk, and data breaches. Each engagement included scenario design, facilitation, and after-action reporting, enabling clients to strengthen incident response plans and improve overall cyber readiness.

Training and Development

- CyberVault Solutions delivered comprehensive cybersecurity training and workforce development services, empowering over 500 individuals to successfully launch careers in cybersecurity. Our program combined expert-led instruction, personalized mentorship, hands-on labs, and simulated interviews to build real-world skills and job readiness. In addition to individual coaching, we supported organizations through insider threat management consulting and cyber awareness training, helping to foster a proactive security culture and strengthen internal defenses.

OUR TRUSTED VENDOR PARTNERS

# "We excel in our respective areas and guarantee customer satisfaction."

CORE COMPETENCIES AND CAPABILITIES

ZTNA ENGINEERING & COMPLIANCE

Our team excels in implementing top compliance practices and standards across the industry. We leverage established evidence, artifacts, and data from your initial assessment to streamline alignment with any relevant framework. This approach ensures thorough compliance, efficiency, and the effective management of any compliance-related issues, maintaining your organization's security and adherence to industry standards.

CYBERSECURITY TRAINING

We leverage proven evidence and industry best practices to design customized training programs that empower your employees with the essential knowledge and skills to combat cyber threats effectively. By enhancing your organization's overall cybersecurity posture, our comprehensive resources address all training needs, transforming your team into a formidable defense against cyber threats. Our approach integrates leading tools and methodologies to ensure your cybersecurity training efforts are precise and impactful.

CYBERSECURITY WRITING

We manage the complexities of cybersecurity proposal writing, which demands greater detail and precision than standard technical proposals. By highlighting your strengths and expertly showcasing your strategies, frameworks, and personnel, we craft compelling proposals that position you for success and help secure valuable opportunities. Let us take the burden off your shoulders, ensuring your company stands out in the competitive landscape.

OUR LEVERAGED FRAMEWORKS

While we strictly align with CISA's Zero Trust Maturity Model and methodology, we also ensure the seamless integration and implementation of additional industry-standard frameworks within organizations. These frameworks are designed to complement CISA's Zero Trust approach rather than operate in isolation.

Our methodology ensures that frameworks coexist effectively, with controls and policies being cross-mapped to multiple frameworks for enhanced security alignment. This approach allows organizations to maintain compliance, strengthen security postures, and achieve a comprehensive, adaptable cybersecurity strategy.
