Orange County COVID-19 Testing Locations

The following testing locations offer COVID-19 "PCR" testing that can identify if someone is currently infected with the SARS-CoV-2 virus, which causes COVID-19. The test does not identify a past infection and may not identify someone as positive if it is early in their infection period.

This list includes public and private sector locations identified (as of the date of publication) as offering free testing or which accept most insurances without additional co-pays. It is not exhaustive and inclusion does not imply endorsement by the County of Orange. New locations are opening regularly, so please consider searching the Internet for additional locations.

Please contact these locations directly to confirm if you are eligible, if your insurance is accepted, and for any additional pricing information. All testing locations require appointments.
