

WALHONDE TOOLS

TUBE & PIPE CLAMPING EQUIPMENT

TOP LINER™ Pipe Clamps

Precision, heavy-duty pipe alignment for your most demanding applications.

The tough but precise Top Liner range of heavy-duty pipe clamps are made of steel to accommodate heavy-wall & thin-wall pipe for your most demanding applications.

- Models offered in sizes 4" through 72"
- Versatile and extremely easy to use
- Precise high/low and gap spacing adjustments
- Perform rounding functions on Schedule 40 and below walls
- Rugged clamps are ideal for use on heavy wall pipe
- For pipe-to-pipe (PP) or pipe-to-elbows (PE) Applications
- Available in Carbon Steel (CS), Stainless (SS), and Aluminum (AL)
- Get maximum productivity with easy-to-adjust turnbuckles

The easy-to-use turnbuckle system is the key to rapid, precision alignment that says "WALHONDE TOOLS."

INNOVATION NEVER STOPS AT WALHONDE

TOP LINER™ Elite Clamps

When dealing with end-matching requirements, discover the Top Liner ELITE models that offer additional control over your fit-ups with the ability to perform precision "clocking," meaning up to 10° (plus or minus) of radial rotation.

- Models offered in sizes 1" through 12"
- Perform reliable and precise pipe end matching

FAST. PRECISE. EASY.

WALHONDE TOOLS knows that when you have the right tool for the right application, it can make all the difference. They are committed to providing the most innovative solutions to tube & pipe alignment in the heavy construction industry, worldwide.

Exclusively Sold By

 **TRI TOOL**

TOP LINER™ Revolution GEN III Clamps

The mid-weight champion for rapid, accurate, non-stress fit-ups.

Walhonde Tool's newest clamp permits total control of direct pipe-to-pipe, pipe-to-long and short radius elbows, and pipe-to-tees.

- Models offered in sizes 1" through 12"
- Versatile and easy to use
- For pipe-to-pipe (PP) or pipe-to-elbows (PE)
- Available in Stainless Steel

TOOLS THAT ARE MADE TO FIT

Top Liner™
Revolution
Gen III 12"

The compact and easy-to-use Top Liner Revolution Gen III is the perfect choice for light to medium duty (non-stress) clamping pipe applications.

TOP DAWG™ Welded-Lug Clamps

Precise, "big clamp" alignment with welded-lug versatility.

"Top Dawgs" alignment turnbuckles with weldable lugs are compact, practical, and reliable with a proven track record for precise alignment of pipe, plate, tank vessels and steel structures.

- Universal pipe size applications
- 3/4" and 1" diameter turnbuckles
- Easy to replace weldable lugs
- Lugs Available in Stainless and Carbon Steel

Top Dawg clamps are essentially the adjustment elements of the proven Top Liner clamps, designed to be used independently with welded lugs.

We are proud to represent WALHONDE TOOLS.
