

Discover the innovative features!

Discover the features that make the Husky Hopper one of a kind! From its unique replaceable-pin design enabling a great ROI, to the innovative catch-and-release system enabling smooth operations, the Husky Hopper sets a new standard for quality material handling products.

Safety chain

Every Husky Hopper comes equipped with a safety chain to prevent accidental tipping. During dumping, the chain secures the hopper to the lift truck, preventing forward movement.

Replaceable, spring-loaded catch & release

The bolted on catch-and-release mechanism makes it quick and easy to replace wear parts on the hopper.

Replaceable pin

Our replaceable pin design allows for quick and easy replacements to critical components without the need to replace the entire hopper.

Standard drain plug

All Husky Hoppers ship with a drain plug, giving you the flexibility to contain or drain fluids.

Customizations for every application!

With multiple different customization options, the Husky Hopper is ready and able to take on any job!

Lids

Our lids offer the ability to keep chemical odours at bay, keep water and snow out, and more! We currently offer our lids in the following hopper sizes:

Available sizes
1/2 CY
1 CY
1 1/2 CY
2 CY
3 CY
4 CY

Various material gauges

We offer our hoppers in 10 gauge and 1/4" material thicknesses to ensure we have the most durable product for your job, while keeping costs at the minimum.

Casters

Casters offer increased mobility, allowing operators to fit the hopper into spaces inaccessible by forklifts.

Available kits	Capacity (lbs)
4" casters	3200
6" casters	4800
