

POLICY & PROCEDURE

MOUNT HOREB POLICE DEPARTMENT

SUBJECT: USE OF LESS LETHAL WEAPONS

SCOPE: All Sworn Personnel

DISTRIBUTION: Policy & Procedures Manual

REFERENCE: WI State Statutes: 939.22(14), 939.45,

939.48, and Chapter 941; DAAT Incident

Response and Disturbance Resolution Model

NUMBER: 5.02 ISSUED: 02/04/2021

EFFECTIVE: 02/04/2021 ☐ RESCINDS

☐ AMENDS

WILEAG 5TH EDITION

STANDARDS: 5.1.1, 5.1.2, 5.1.3, 5.1.4, 5.2.1, 5.3.1, 5.3.2, 12.1.1.1,

12.1.1.3, 12.1.3.1, 12.1.3.5

INDEX AS: Baton

Control Devices Deadly Force De-escalation

Conducted Energy Weapon

Firearms

Less Lethal Weapons Non-Deadly Force

Use of Less Lethal Weapons Weapons Pre-Authorization

PURPOSE: The purpose of this Policy & Procedure is to establish policies and procedures regarding the use of less lethal weapons, including de-escalation measures and to identify the responsibilities of officers of the Mount Horeb Police Department when using them or after they have been used.

This Policy & Procedure consists of the following numbered sections:

- I. POLICY
- II. DEFINITIONS
- III. PROCEDURES
- IV. TRAINING

I. POLICY

A. It is the policy of the Mount Horeb Police Department to value and preserve human life therefore; officers shall use only the force, including less lethal force that, is reasonably objective to gain control, while protecting the lives of the officer or others. Officers may consider in their decision to use this force option, information known to the officer(s) at the time of the incident or conduct or statements by the subject or a prior history of resistive or assaultive behavior. Preclusion must be considered before use of deadly force. Preclusion states that you must reasonably believe that all other options have been exhausted or would be ineffective. Deadly force SHOULD only be used as a last resort.

II. DEFINITIONS

- A. DEADLY FORCE: The intentional use of a firearm or other instrument, the use of which would result in a high probability of death.
- B. DE-ESCALATION: Taking action or communicating verbally or non-verbally during a potential force situation in an attempt to stabilize the situation and reduce the threat without the use of force or with a reduction in the force necessary.
- C. DEFENSIVE AND ARREST TACTICS (DAAT): A system of verbalization skills coupled with physical alternatives.
- D. ELECTRONIC CONTROL DEVICE (ECD): A less lethal force weapon that causes electro-muscular disruption to a combative, violent, or potentially combative, violent subject. The use of this device is intended to incapacitate the subject with a minimal potential for causing death or great bodily harm.
- E. GREAT BODILY HARM: "Bodily injury which creates a substantial risk of death, or which causes serious permanent disfigurement, or which causes a permanent or protracted loss or impairment of the function of any bodily member or organ or other serious bodily injury." WI State Statute 939.22(14)
- F. NECK RESTRAINT: an action taken by the use of any force or device to the neck area to restrain a person, including but not limited to:
 - 1. Choke Hold A physical maneuver that restricts an individual's ability to breathe for the purposes of incapacitation.
 - 2. Vascular Neck Restraint A technique that can be used to incapacitate individuals by restricting the flow of blood to their brain.
- G. NON-DEADLY FORCE: That amount of force which does not meet the definition of deadly force, but which is an amount of force which, in normal circumstances, can cause bodily harm.

H. REASONABLE FORCE: That force which an ordinary, prudent, and intelligent person with the same knowledge of the particular situation as the officer would deem necessary.

III. PROCEDURES

A. Batons

- The baton may be used by an officer only when it is reasonably apparent that a lesser degree of force would be inadequate to control the situation.
 The baton may be used by an officer to subdue a violently resisting subject, in self-defense, or in defense of a third person if lesser methods have failed, or if circumstances warrant the immediate use of the baton.
 - a) Only those officers qualified in the Defensive and Arrest Tactics System shall be allowed to carry or use a baton.
 - b) The acceptable primary target areas for the baton are the elbow, knee, and abdomen.
 - c) The intentional striking of an individual above the shoulders is prohibited. Generally, a strike to the head with an impact weapon is considered deadly force and should not be used, unless such an action is justified under the use of deadly force.
 - However, it is recognized that because of a person's own resistance, the accidental, unintentional striking of a person above the shoulders may occur. If that happens, the officer must articulate this in detail in the report of the incident and will seek immediate medical attention for the subject if treatment is necessary.
 - d) Department-approved batons are the only authorized batons. Other devices, flashlights, radios, firearms, etc., are not recommended to be used as impact weapons; however, the Department recognizes that emergency self-defense situations involving other objects and instruments may occur. Expandable or wooden batons are authorized providing the baton of choice is readily available for on-duty, uniformed officers.
 - e) When a baton is used against the body of a person, the officer should notify a supervisor and complete an Incident Report.
- 2. The use of neck restraints with a baton or other device by personnel of the [Y] Police Department is prohibited unless the situation requires the use of deadly force that would be justified.

- B. Kinetic Energy Impact Projectiles (Beanbags).
 - 1. Kinetic energy impact projectiles, commonly referred to as "beanbag rounds" may be utilized by trained Department personnel in circumstances where a level of force less than deadly force may be appropriate for resolving the situation, and when the risk associated with closing on the subject to take control makes other alternatives unsuitable.

The option to use kinetic energy impact projectiles may be used when a person poses a significant threat of harm to self or others and unarmed tactics have either been exhausted or would not be effective or safe given the circumstances.

Officers may include in the decision to use this force option information known to the officer at the time of the incident, including conduct of or statements by the subject or prior history of resistive or assaultive behavior.

- 2. When utilized, the Department places the use of kinetic energy impact projectiles and other Less Than Lethal Munitions at the Intermediate Weapon Mode. Less-lethal is defined as the "intentional use of an instrument to impede a subject, the use of which would not cause death."
- An officer should not brandish, display or threaten the use of kinetic energy impact weapon unless he/she can reasonably conclude it use may become justified and is anticipated.
- 4. When kinetic energy impact projectiles (beanbag rounds) are used against the body of a person, the officer should notify the Chief of Police or a supervisor and will complete an Incident Report detailing the circumstances of the incident.
- 5. Only Department-authorized and issued kinetic energy impact projectiles may be used.
- 6. When deploying a 12-gauge shotgun as a less-lethal option, the stock and fore grip shall be orange. Officers shall announce via the radio and / or verbally that they are deploying a less lethal shotgun to make other officers aware and prevent sympathetic firing of lethal rounds.
- 7. Kinetic energy impact projectiles may be delivered to the subject's body in accordance with the following guidelines:

- a) Primary Target Areas (legs and Buttocks): In addition to legs and buttocks, arms may also be considered a primary target under some circumstances. The officer must consider the proximity of the targeted portion of the arm to vital areas of the body. Primary target areas are considered when incapacitation is necessary but the threat is not imminent. Multiple impacts to the primary target areas should be considered before progressing to the secondary target area.
- b) Secondary Target Area (Lower Abdomen): The secondary target area is considered when incapacitation is critical due to the imminent threat posed by the subject, but deadly force has not yet become necessary.
- c) Head/Neck/Chest Area: Intentional impact to these areas is avoided unless the use of deadly force is justified.
- 8. In each instance where kinetic impact projectiles are deployed at an incident, a determination should be made regarding the need for lethal cover. Lethal cover is required in all cases in which the subject possesses a firearm.
- 9. Subjects who are struck by a kinetic energy impact projectile should be transported to a medical facility.

C. Chemical Control Device

- The aerosol chemical control device authorized by the Department contains oleoresin capsicum (O.C.). No other aerosol chemical restraint is authorized or allowed without prior approval from the Chief of Police or designee. All O.C. must be non-flammable.
- 2. When an officer is threatened with physical force or dealing with a resistive or combative person and lesser control factors are ineffective, consideration should be given to the use of control devices.
- 3. All uniformed officers issued O.C. aerosol will be required to carry it while on duty unless replaced by a Conducted Energy Weapon (ECD) in which case it must be in the squad. This rule shall not apply to administrative personnel and other officers assigned to plain clothes duties within the Department.
- 4. O.C. aerosol will be used consistent with the training provided by the Department and/or the Wisconsin Training and Standards Bureau. Trained officers shall complete a refresher update every two years concerning the use of this weapon.

D. ELECTRONIC CONTROL DEVICE (ECD):

- Only officers who have satisfactorily completed the Department's approved ECD certification training course shall be authorized to carry/use such weapon.
- 2. The ECD may be used by trained officers when a subject is threatening to

actively resist or is actively resisting an officer and the subject poses an articulable threat of harm to an officer or another person. It may also be used when a subject poses a threat of harm to themselves such as self-inflicted injury or a suicide attempt.

- 3. The ECD is considered to be in the Control Device section of the Intervention Options on the Disturbance Resolution Model.
- 4. Any use of the ECD should be consistent with the manufacturer's recommendation and precautions, to include, but not limited to:
 - a) Drive stuns are pain compliance only and are discouraged. Drive stuns may be used to "complete the circuit," in the event one of the probes does not connect.
 - b) Officers should aim for the proper target zones when using the ECD.
 - c) It is not recommended to use more than three (3) cycles on an individual. Each cycle must be justified and any more than three (3) cycles requires greater justification.
- 5. Passive resistance without posing an articulable threat of harm to officers or others does not permit the use of an ECD.
- 6. An officer shall not brandish, display, or threaten the use of an ECD unless he or she can reasonably conclude its use may become justified and is anticipated.
- 7. In each instance that an ECD is deployed in an incident, consideration should be made regarding the need for lethal cover.
- 8. Officers who deploy an ECD against a subject shall ensure the subject is monitored for injury as soon as practical after the subject is under control.
 - a) If an adverse reaction to the ECD occurs, or if requested by the person, emergency medical services shall be provided to them.
 - b) If the probes are imbedded in sensitive tissue areas, i.e. neck, face, groin, or breasts, officers shall arrange transport to a medical facility for removal. If the probes are imbedded in other non-sensitive tissue areas, an ECD trained officer may remove them according to the trained procedures.
 - c) After the probes have been removed, they shall be handled as a biohazard and packaged according to the trained procedure. Photographs of the wound site shall be taken if practical. Probes and wires will be retained as evidence. If there are AFIDs from the Taser deployment, one or two should be collected for evidence as well.

9. Restrictions/Limitations on ECD Deployment

- a) The ECD should not be used in the following circumstances unless exigent circumstances are present, and those circumstances are clearly articulated:
 - When the officer knows the subject has come in contact with flammable liquids, or is in a flammable atmosphere.
 - When the subject is in a position where a fall may cause substantial injury or death.
 - Punitively, for purposes of coercion, or in an unjustified manner.
 - When a subject is handcuffed and offering no active resistance, or is offering resistance which may be overcome using lesser force.
 - When the subject is visibly pregnant.
 - When it is reasonable to believe that incapacitation of the subject may result in serious injury or death.
 - In situations where the subject is in an elevated position where there is a high possibility that the subject may fall if incapacitated by the ECD.
 - In situations where the subject is in close proximity to water where, if incapacitated by the ECD, there is a high probability that the subject could drown.
 - When the subject is at the extremes of age (young or old), or physically disabled, or has a low body fat percentage.
 - When a person has an apparent debilitating illness.
 - Around a police K9, as a shock to the K9 can limit their effectiveness / affect the K9 bite training

10. Detention Facility Notification / ECD Use

a) Upon use of an ECD on a subject who is subsequently placed in a detention facility, officers will notify detention personnel of such ECD use and any other details that may be appropriate (such as injury complaint).

11. Use of the ECD on Animals

- a) ECD may be used on animals when:
 - (1) A vicious animal is threatening or attacking a person or other animal and the use of other force is not reasonable, or may not be desired given the situation.

- (2) An animal needs to be controlled for reason of public peace or safety, preservation of property, or other legitimate purpose; and the animal poses an active threat to officers in their efforts to perform their duties.
- b) Officers should be prepared to use other justified force if necessary.
- c) Officers should be prepared to apply conventional controls once the ECD has subdued the animal.
- 12. When a ECD is deployed against a subject, the officer shall notify a supervisor, and shall complete an offense report detailing the circumstances of the incident. Officers shall request the Lieutenant to print the Taser statistics from their device for the times of the deployment for the report file.
- 13. Supervisors shall complete a Supervisor ECD Use Report Form.
- 14. Trained officers shall complete a refresher course and a written examination every two years concerning the use of this weapon.

IV. TRAINING

A. Training whether noted above or not for less lethal weapons shall occur at a minimum biennially for officers authorized to use such weapons or techniques.

Doug Vierck Chief of Police
