

The SPAN difference

SPAN Panel

Powur Price: ~\$4,700 - \$5,000*

Sales Consultant Value

Simplify & maximize battery backup sales offerings

No need to ask homeowners what loads they would like to backup & provide ultimate backup experience.

SPAN makes it easier to talk about electrical changes

Avoid main panel upgrades in meter/main markets & use SPAN as the new main in meter-only markets.

Homeowner Value

An energy savings dashboard for their home

Insight and control of the home will allow your customers to save more money on their energy bill.

Best battery backup experience in the market

Automate which appliances & circuits you want backed up with the ability to make changes immediately.

Traditional panel

Powur Price: ~\$2,800 - \$4,500

No savings opportunities

Basic circuit breaker functionality that doesn't enable reduced consumption for energy savings.

Future upgrade costs & disruptions

Utility service or panel upgrade required when adding new high-draw loads to your home.

Manual breaker control

Breakers can only be managed at the panel and must be flipped by hand.

Zero visibility

No energy insights or actionable data; no smartphone or tablet app dashboard.
