

Application Guide

Nail Foil: **Nail Foil** is applied by transferring the foil color from the foil backing to the nail on a tacky nail surface. Begin by applying one coat of **Kami Nail Foil Adhesive** to the nail, either by covering a broad area or by drawing a design on the nail wherever you want the foil transfer. Let the adhesive set for approximately one minute or until tacky. Apply the **Foil** to the nail, gently pressing in place with **Marbleizing Tool**, orangewood stick or finger. Carefully lift off backing, then seal design with **Sealer/Bonder**. **Note:** **Kami Nail Foil** will transfer to a tacky nail surface. If the nail surface is tacky from the application of a product, it may not be necessary to use **Kami Nail Foil Adhesive**.

*Kami Nail Art offers the most extensive line of **made in the USA** professional nail art with dazzling products including glitter, foil, confetti, striping tape, decals, brushes and so much more....plus Swarovski Crystals!*

Application Guide

Crystal Rhinestones, Metallic Pearls & Leaves, and Confetti: Apply one coat of **Kami Nail Art Sealer/Bonder** to nail. Using a wet orangewood stick or **Marbleizing Tool**, lift stones and place them onto a tacky sealer. When design is complete, apply one or two coats of **Sealer/Bonder** to secure in place. An additional coat of **Sealer/Bonder** may be applied every two to three days to keep design secure.

Striping Tape: All **Tapes** have a sticky back but are best applied on top of a tacky coat of **Sealer/Bonder**. Cut **Tape** to size, apply to nail. Cut 1/16" short of the free nail. Many interesting designs may be created by running parallel or crisscrossing **Tapes**. Seal finished design with **Sealer/Bonder**.

Striping Brush: When using the **Striping Brush**, let the tip of the brush do the work. Pulling the brush through the polish or paint several times allows it to hold more when you desire thicker stripes. Stripes may be added vertically, horizontally or diagonally. Multiple striping adds many more interesting possibilities.

Marbleizing: Polish nail with base color and allow to dry. Apply on or two drops of two or three colors, using the **Marbleizing Tool** to swirl the colors together into a marble-like effect. Seal with **Sealer/Bonder**.

Drag Art: Apply one, two, or three lines of polish or paint in different colors onto the nail. Using the full length of a clean, dry **Kami Striping Brush** and starting at the edge of the wet line of polish or paint, drag several lines of one color through the other colors or onto the dry nail.

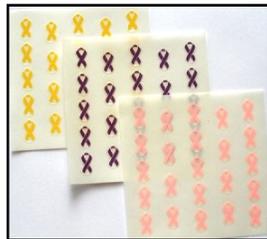

stick-on Decals: As the name implies, **Stick-on Decals** have a sticky back; however, for the best results apply them onto a tacky coat of **Sealer/Bonder**. Seal the finished design with **Sealer/Bonder**. Cut **Decals** into smaller pieces and use to create new designs.
