Kami Nail Art Foil Mixed Metals

Kami Nail Art Foils create the perfect “mixed metals” finish for any polish color. A smattering of Metallic Gold, Bronze, and Purple, for instance, over deep crimson gives hands a touch of elegance with the metallic foils casting plenty of light. Apply Kami Nail Art Foils (available in 32 colors and designs) with Kami Nail Art Foil Adhesive, and then finish with Kami Nail Art Sealer. **Nail Foil can be removed easily with nail polish remover**

1. Apply a thin, even layer of Kami Foil Adhesive to the dry, polished nail. Let it dry until very tacky — the color will change from milky to clear.
2. Place the dull side of the Kami Metallic Bronze Foil onto the nail. Press down to deposit the foil. The foil will adhere to the area where pressure is applied. OR: Place Foil on the nail, but do not press down. Draw designs with Kami Marbleizing Tool.
3. Remove the foil to see the design. Reapply Foil Adhesive and repeat with Metallic Purple Foil.
4. Lift Purple Foil.
5. Reapply Adhesive and apply Metallic Gold Foil and remove.
6. Seal design with Kami Nail Art Sealer or top coat.
