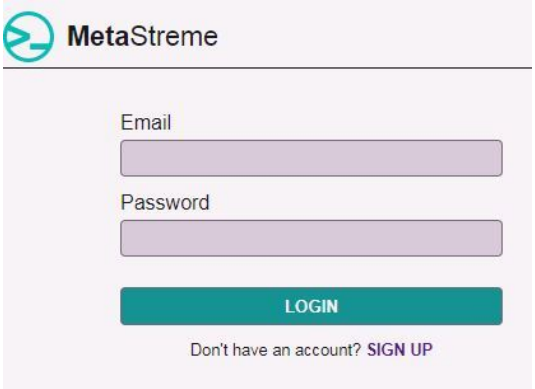
MetaStreme

MetaStreme Newsletter December 2021

Welcome to our first newsletter in some time and apologies for lack of updates as we have been laying low while completing important back-end improvements and getting our client portal ready for general release.

We would also like to send out a big thank you to all our beta testers and subscribers. We hope to make a big impact in bringing more utility to the BSV network over the next couple of years and greatly appreciate the level of support we have received from many members of the BSV community.



MetaStreme Client Portal

Client Portal

The portal allows builders to take control of their MetaStreme projects facilitating the management of API keys, funds, requests and accounting on a per project basis.

We invite anyone wanting to explore how MetaStreme can assist in the rapid and reliable deployment of many Bitcoin based applications to *signup for an account*

After creating an account it will allow the setup of testnet instances but get in touch with us if you are ready to launch the project on the mainnet. *Client Portal Documentation*. Each testnet account setup will receive 0.5 testnet coins to get started.

There is much more to the platform than is clear through the limited scope of our current API. If your project requirements are not covered please get in touch to see if we can facilitate your requirements. *API Documentation*

Any feedback on improvements or issues with the portal would be greatly appreciated as this is a starting point but we will be integrating much more functionality over time.

mAPI integration

We are pleased to announce that we have entered into agreements with both TAAL and Gorilla Pool for access to their mAPI interface enabling direct request broadcasts and competitive negotiated fee rates.

mAPI

Depending on the urgency of getting transactions confirmed, significant savings on network fees can be realised by those in no rush.

We will continue to utilise our aggregated transaction volume to ensure we can offer the best service options and fees available on the network.

PROOF OF ESG

ESG Stamp

ESG Initiative

ESG Stamp founded by Bryan Doherty aims to bring verifiable truth to corporate and institution ESG reporting around the globe.

We are proud to partner with Bryan and other collaborators and look forward to assisting in bringing the utility of this vision to the BSV network.

More info on this great initiative can be found at https://esgstamp.org

For any further enquiries please contact us info@metastreme.com

Have a safe and happy festive season
