

Summer Camp Themes

Week 1: Nature Detectives

Armed with magnifying glasses and field journals, we're hunting for "treasures". It's all about building observation skills while hunting for the coolest bugs and leaves in Unplug & Play's outdoor playground.

Week 2: The Little Gardeners

Time to get the hands dirty! Kids will learn the science of how things grow by planting their own seeds and learning how to care for them. Patience has never tasted so much like fresh herbs.

Week 3: Junior Architects

Give a preschooler a box, and they'll build a world. We're focusing on teamwork and spatial reasoning as we design and construct a massive "Montclair City" out of recycled materials.

Week 4: Kitchen Chemists

Science you can touch! We'll explore chemistry through safe, messy kitchen experiments—like making "magic" playdough or watching fizzy reactions. It's sensory learning at its peak.

Week 5: Mini Musicians

From DIY drums to rhythm games, this week is all about finding our beat. We're working on coordination and listening skills while making a whole lot of joyful noise.

Week 6: Around the World

Grab your "passports." We're virtually traveling to different countries, learning about new cultures through art, music, and a few tasty international snacks.

Week 7: Storybook Adventures

We're bringing the library to life. Every day is a new adventure as we act out our favorite books, building literacy and confidence through dramatic play.

Week 8: Under the Sea Water Wonders

A deep dive into sensory play. With water bins, "ocean" slime, and outdoor water play (NO SWIMMING), we're learning about the wonders of the blue while keeping cool in the sun.

Week 9: Space Explorers

3... 2... 1... blast off! We're nurturing big imaginations by learning about the moon, stars, and planets through "out of this world" crafts and space-themed play.

Week 10: Tiny Veterinarians (The Stuffed Animal Hospital)

We're inviting every camper to bring a special stuffed friend from home for a full check-up. Using toy stethoscopes and gentle hands, our little vets will learn how to care for their "patients" while exploring the basics of biology and how our hearts beat.

Week 11: The Olympic Games

We're closing out with a bang. It's a week of friendly competition, obstacle courses, and learning about sportsmanship. Every camper goes home a gold-medal friend!
