What is the difference between fragrance oil and essential oil?

Essential Oils

- Made from plants and other natural products
- Steam distilled to produce the oil
- Completely natural
- More expensive
- Not available for most fragrances
- Designer-named fragrance oils are never essential oils

Fragrance Oils

- Fragrance oils are used to make perfumes, cosmetics, and flavorings.
- They can be made to almost any fragrance, not just nature scents,
- Cost is normally much lower than the essential oils.
- More options, and a lot more fragrance for your money.

What is the difference between oils that you burn and oils that you wear?

There is no difference in the oil itself. Some oils are popular for burning, because people like that fragrance in their home - you can think of cherry or frankincense. Other oils are most popular as perfumes. A person may not want to smell like cherry, and may not want their house to smell like Chanel #5. But a person can wear cherry and can burn Chanel #5 if they want to.

Carrier (cutting) oils

Help your oils last longer

Normally our customers sell the oils uncut. There are times when oils need to be cut, however. DPG is normally mixed with oils when they are being used in an oil burner or in making incense. Grapeseed oil is the lowest priced carrier oils, it works great for massage and aromatherapy.
