

Smart EV Charging for Fleets

Reduce your fuel costs and make sure your vehicles are charged 100%

SemaConnect, the leader in smart charging solutions, makes it easy to charge your EV fleets and make sure they are ready to go. Smart charging for your fleets ensures you have all the information you need in a smart dashboard, including detailed reports on electricity used, carbon offset, fuel savings and more.

- Make sure your EV fleet is fully charged and ready to go
- Receive alerts when a vehicle is not plugged in by a “set” time
- Access controls prevent unauthorized use
- Daily reports provide your fleet’s charging status
- Cloud-based management provides reporting on use & savings
- Maximize the efficiency of your operations
- Make a positive impact on the environment
- Meet sustainability goals
- Make stations available to the public during business hours
