# Strengthen Your Leadership

in sustainability by providing charging stations  
for your employees and visitors.

As a real estate owner or corporation, **you can help lead this new industry** by installing charging stations for your employees and visitors. We work closely with you to develop a charging station program that can get you up and running quickly, and then scale easily with the rate of electric vehicle adoption.

## Benefits of installing SemaConnect Stations include:

The head unit of the **Station is only 6" x 6" x 18"**, so it is easy to integrate into space-limited corporate parking locations.

The SemaConnect Station has been designed to be visually compelling to **effectively enhance the image of its host property location.**

Installation is simple, quick and affordable. The electrical service connection only requires **3 wire nuts, 4 screws and you're done!**

Reduce the cost and complexity of converting to electric vehicles with only one simple service fee.

Be a leader in this highly visible, sustainable industry.

Provide a valuable amenity for your EV driving employees.

Every time a visitor or tenant enters or leaves your building, they will be **reminded of your commitment to sustainability.**

The Station system includes environmental reports for carbon offset and oil reduction.

Mass-market electric vehicles have arrived. The industry is being driven by major improvements in battery technology.

As a result, this new and exciting industry **is here to stay and is expected to grow rapidly.**

**Small Footprint**

**Sleek Enclosure**

**Ease of Installation**

**Simple Service Fee**

**Green Benefit**

**Employee Satisfaction**

**Property Value**

**Environmental Reports**
