

Govern the data. Trust the AI.

AI Data Governance for Heavy Industry Asset Owners
Reliability | Maintenance | Turnarounds

NAViGuard[™] is the governance layer between your operational data and every AI tool your people use. It sits across SAP/EAM, Oracle P6, process historians, and inspection records — so intelligence reaches decision-makers while your data stays protected, traceable, and yours. AI recommends; humans remain accountable, with the evidence to stand behind every call.

Reduce breach exposure

Role-based access, encryption, and IP/PII redaction keep asset, cost, and personnel data inside your tenant. Nothing trains public models.

Eliminate shadow AI

Detects P&IDs, cost sheets, and findings pasted into personal chatbots — and replaces them with a sanctioned, asset-aware alternative.

Defensible AI decisions

Data lineage and quality scoring trace every recommendation — from RCBA trade-offs to re-sequencing — back to validated source data.

PSM-grade governance

Validation, management of change, and continuous monitoring — elevating AI governance to the category of process safety.

PACKAGING & INDICATIVE PRICING

TIER	BUILT FOR	WHAT'S INCLUDED	ANNUAL INVESTMENT
Essentials BOARD THE TRAIN	Reliability & maintenance leaders establishing the data foundation	Governance foundation: CMMS/EAM data-quality scoring, asset-hierarchy integrity checks, data lineage across SAP-P6-historian, AI usage policy pack, quarterly governance scorecard	\$15K / site Single-approver entry point
Pro ACTIVE ENFORCEMENT	CISO + turnaround director, per site or multi-site	Everything in Essentials, plus: sanctioned AI gateway with full audit trail, role-based query controls, IP/PII redaction, shadow-AI detection & alerting, elevated turnaround-mode controls during STO windows	\$45K / site Fleet discounts from 3 sites
Enterprise BUSINESS CLASS	Owners embedding governed AI agents across the fleet	Everything in Pro, plus: governance embedded in Agent NAVi (iQ130) — every recommendation explainable, auditable, and constrained by your RAMP & RCBA frameworks; dedicated governance success lead	Custom Fleet & enterprise pricing
Advisory CONSULTING SERVICES	Any tier — assess, build, certify	AI Readiness & Risk Alignment Assessment (fixed-fee, 4–6 wks) · AI Governance & Assurance Framework build-out with PSM rigor · Annual governance audit & recertification aligned to subscription renewal	Fixed-fee Scoped per engagement

Pricing shown is indicative for planning purposes; final pricing is confirmed at proposal. All tiers deploy in your environment — your data never leaves your control.

Identify your highest-value governance and decision opportunities — from the shop floor to the boardroom.
