# NEXT-GENERATION STO NAViGATION

REDUCING INDUSTRY PRODUCTION LOSSES

Real-time, AI-driven risk-avoidance app predicts, detects, and mitigates cost, schedule, and production losses during heavy industry shutdown, turnaround, and outage event execution.

PREDICT | PREVENT | EXECUTE

NAVi™ (Navigation Alerts and Variance impact) AI-Collaborative App

- Live digital risk co-pilot for schedulers, site managers, and executives
- Connected to critical data from Oracle® Primavera™ P6 and SAP®
- Assisted by an AI agent programmed to predict and prevent risks
- Low-cost web-based setup and support for one or many STO events

NextGen NAVIGATOR®

> **"** *Heavy industry asset owners who encompass AI-collaborative agents today will lead the industry in risk-avoidance navigation tomorrow."*
>
> —EJ Lister | CEO, Founder

Agent Navi model iQ130

Agent Navi is the AI collaborator embedded in our NAVi™ platform engaged in agile scheduling, tactical execution, and risk avoidance and mitigation with its human planner, scheduler, and controls collaborators; imagine, a 24/7 PhD researcher continuously learning, analyzing, and calculating to respond with risk-avoidance alerts and mitigation options *for one-tenth of a human's salary!*

ORACLE®
PRIMAVERA

Introducing NAVi™ Elite Team Members trained to collaborate with Agent Navi one-on-one, remotely, or face-to-face with your team in preparation of your STO event as well as supporting your team members during the execution phase, remotely, or on site.

- Sustaining Members of iAPSCC® | international Association of Planning, Scheduling, Controls and Coordination
- Graduates of our own **NAVi**Academy™ (Vancouver, BC Canada)
- Available for short-term assignments related to NAVi™ setup, training, consultation, configuration, and benchmarking
- Available for long-term rotational assignments (planning, scheduling, controls, coordination) in oil and gas, mining or power generation
- Oracle® Primavera™ P6 agile scheduling specialists
- Competent facilitators and effective communicators
- Establish Tactical Execution Controls Center (TECC) with NAVi™ at ground zero for effective navigation and controls of your STO events

Deployment and Pricing Options

NAVi™ iSMART® (with Agent Navi) is deployed as a web- and cloud-based app on an *event* basis with two-tiered pricing. **Note**: on premise hosting is currently <u>not</u> available under these pricing options.

Tier One (Pilot)

- Event-based license agreement for 3 users
- Oracle® Primavera™ P6 layouts and reports
- 1,000 AI agent-generated database queries
- Free upgrades (iQ130 and up)
- One-year maintenance services for data security
- Step-by-step instructions for agile scheduling and controls
- Earned-value s-curves, histograms, and key analyst performance reports / exports
- Remote training and setup for STO execution team members

USD$24,500.00

Tier Two (Navigator)

Everything in Teir One, plus:

- 3 additional users
- Additional 2,000 AI agent-generated database queries
- LEMS (Labor, Equipment, Materials, Services) module for vendors and contractors
- Additional two-year maintenance services
- Oracle® Primavera™ API setup
- Field tablet configuration for progress updating
- Data integration from CMMS and/or ERP systems
- Database access for exports
- Opt-in industry benchmarking

USD$38,500.00
