
Job Title – Design Engineer

Location – Ballymena, Northern Ireland

Closing Date – 29th August 2025

About us

Due to demand in our innovate services and future growth plans, we have an excellent opportunity for someone to join our expanding team. Demanu are a product design and manufacturing company offering end to end product development with options for small batch contract manufacturing. Where we are unique is that we have a deep understanding of manufacturing through many years of shop floor experience and lean manufacturing.

As a company, we are agile and fast moving with a passion for bringing customers ideas to life. Our working environment is fun yet challenging and offers the chance to learn a wide range of skills through different styles of projects.

Job Description:

As Design Engineer you will be part of the product development team who solves customer problems, designs for manufacture and brings products to life. The generation of ideas is crucial to product development and as such, you will be required to think outside of the box to provide product design solutions. The main roles and responsibilities for the job would be as following:

Main Responsibilities:

- Supervise and collaborate with production staff in hands-on operations.
- Manage customers prototypes through to manufacture.
- Provide industrial design solutions capable of being manufactured.
- Liaise with customers to ensure products meet their requirements.

Essential Criteria

- Positive Attitude to work and learning.
- SolidWorks Experience
- Previous product design or mechanical design experience.

To apply for the above role please email your CV with a short cover letter to info@demanu.co.uk
