

Hwy 12 Median Barrier Safety Improvement Project near Maple Plain

Project Description

MnDOT is planning to construct a center concrete median barrier along Highway 12 from County Road 6 to County Road 29 near Maple Plain. The project includes pavement improvements, better accessibility and improved drainage. The project runs May through September 2021.

Purpose

The median barrier will improve safety by preventing crossover crashes on Highway 12.

Traffic impacts

Highway 12 will be restricted to local traffic between County Road 6 and County Road 92. The detour is County Road 6. Some sections will be closed.
