

As The Colonial Crip, it is my responsibility to protect my indigenous existence on Earth. The preservation of my existence has led me towards a direction of reform which has been focused on humanizing the aspects of myself which are systemically and systematically degraded into violence. This humanization has been able to be possible because of my access to Nature and the acceptance and respect that I hold for it.

As I continue on my journey of reform I feel called to begin establishing an environmental structure for the creation of Indigenous Black American society which will elevate and ascend the criminalized Black community into a sovereign and separate democratic republic of indigenous tribal communities across America. As I focus on the creation of the pathway to reform and redemption which is needed to assemble and organize these communities into a higher power of responsible leadership, I require parallel activism to actualize these goals.

As a Volunteer Environmental Activist at Colonial Crip, it will be your responsibility to raise funds, reach out to the community, establish and develop positive reputation in both pro-black and non-black spaces, and properly and respectfully advocate for the environmental reconstruction required to rebuild Black communities with proper and private access to Nature, natural living and lifestyle resources.

Your role may include prisoner advocacy and outreach as well as prison reform activism and education about prison to the general public, as well as providing historical context and background relating to the evolution of slavery in America and the colonization of the world.

We are always searching for social media influencers who are educational in their content to inform their audience.

In addition, we are searching for abundance minded fundraisers who can solely focus on raising money and receiving donations in the form of money, land, or political power for Colonial Crip.

Keep in mind that we will be representing and advocating for the most oppressed people on Earth and their equal (separate and integrated) right to access and experience Nature freely without persecution, policing or fear for their safety. Every power that pre-exists is complicit with the genocide of those we will be advocating for. By associating and participating with Colonial Crip, you may be placed in danger that can result in death or worse. Please do not involve yourself with our movement if you are not happy and proud to take this risk.

For those still interested in this opportunity for community advancement please reach out to me.

I am available in person at 29 Edgewater Ave if you have respect.
