

Consulting | Technology

Nexo Solutions has the most comprehensive line of engineering consulting, testing and technical services for Amine Units and Gas Processing worldwide. Our solutions are matched to individual units for improving process performance, plant reliability and profitability.

Challenges We Solve

- Unstable Process
- Solvent Foaming
- Equipment Fouling
- Equipment Corrosion
- High Operational Costs
- Lack of Operator Training
- Inefficient Process
- Reduced Unit Capacity
- Frequent Unit Down Time
- Equipment Failures
- High Filtration Costs
- Solvent Losses/Carryover
- High Sulfur Emissions
- Hydrocarbon Ingression
- Short Molsieve Lifetime
- Methanol Contamination
- High NGL Color Specification
- Low Coalescer Performance
- High Iron Sulfide Deposits
- Deficient Vessel/Tower Internals
- Lack of Quality Supplies
- High Feed Gas Contamination
- Lack of Consistently Meeting Specs
