

Foam Test Kit for Process Solvents

Process solvents such as alkanolamines, glycols and many others can foam and testing necessary. The foam test kit from Nexo Solutions allows users to test foaming conditions immediately, consistently, and begin building a history of comparable data of foaming events. The foam kit was designed to help optimize the antifoam selection and effectiveness, test the performance of a carbon bed and much more. Every foam kit comes packed in a heavy-duty case for easy transportation, parts and supplies. Assembly time takes less than 5 minutes.

Each foam test kit includes:

- Operation manual
- Foam Test Columns (2)
- Air Pump
- Connections, tubing and clamps
- Wash bottles (2)
- Spare parts
- Heavy duty case for transportation
- Excel calculator sheet for plotting results
- Thumb drive with videos and additional information
- Antifoam library (7 different non-silicone antifoams)
