Enriched air diving is fast becoming a major safety consideration for scuba dives. It not only can be a safer breathing gas, because it contains less of the narcotic gas Nitrogen, but it can also increase bottom time and make the diver feel better at the end of their dives. Nitrox programs stress Oxygen clean and Oxygen compatible gas and equipment. These standards and training techniques are critical to maintaining incident free diving involving Enriched Air. The Mission Statement of Divers Training & Supply, Inc. has always been to: To teach with the highest level of professionalism and instill high expectations on the part of students, that will produce Safe and Confident Scuba Divers. It is with this commitment to Diver Safety and Diver Confidence that I welcome you to this instructional class involving NITROX.

Course requirements: Each student will successfully complete the PADI Online course requirements and link Divers Training & Supply as your training facility. Once a diver has mastered the academic portion of the class, they must complete two dives under the direct or indirect supervision of their instructor in the open water. Students must analyze each tank they will dive and calculate their MOD for their dive. These dives may be done in conjunction with other training exercises including their initial "Open Water" certification. Students must be a minimum age of 10 and have already completed a Jr. O.W. Diver or Open Water certification or be involved in a certification class in conjunction with their Nitrox training. Students will need their instructional materials, a pen or pencil and a calculator for each class.

Class instruction costs are follows:	* Program Instruction	\$186.92
	(not including []scuba gear[])	
	* Materials Included (Notes, tables, etc.)	
	* PADI Certification Processing and Card	
	* Tax	\$ 13.08
