

Guidance on the legal and regulatory aspects to the use and deployment of 9i Robotics Aurascan

Important – The 9i Robotics Aurascan provides an early digital assessment as to whether medical intervention may be required on an individual. 9i Robotics Aurascan is not intended to be used as a medical device or as a medical diagnosis tool and should not be used as such.

9i Robotics Aurascan uses video imaging camera to generate a health and/or psychological report of an individual. The legal and regulatory aspects to the use and deployment of 9i Robotics Aurascan technology depends upon the specific circumstances in which 9i Robotics Aurascan is deployed and the local laws applicable in the location of the intended use. This guidance is intended as a general overview of the relevant laws and requirements and should not be used as a substitute for the users own legal advice.

9i Robotics Aurascan will continue to function were the camera is enabled by a device which is not Wifi connected. All data generated remains on the hardware purchased from us. The operation of the 9i Robotics Aurascan will not transfer any data generated by you to us or any third party cloud operation on our behalf. This users own policy on storage and retention of personal data will continue to apply to all data generated by 9i Robotics Aurascan. The user will be acting as data controller in respect of any personal data and the user will decide how data generated by 9i Robotics Aurascan is used as part of their usual functions acting as data controller. We are neither a data controller nor data processor in relation to any data generated by you using 9i Robotics Aurascan.

It should be noted, however, that data which comprises an individual's health and social well being is generally regarded as special category data in most jurisdictions around the world. This means your existing lawful basis consent may need to be reviewed and updated against the more stringent requirements involving special category data.

Where 9i Robotics Aurascan imaging technology is deployed as part of crime prevention (e.g. to detect violence or aggression) then registration may be required in accordance with local laws as a public surveillance camera. Registration may not be required if the user has already completed registration for the general use surveillance camera. The 9i Robotics Aurascan technology will enhance (but not change) the functionality of existing surveillance cameras. Some Country/Regional specific authorities to be contacted below where 9i Robotics Aurascan is intended to be used as a crime prevention tool embedded into public surveillance cameras.

1. United Kingdom: Security Industry Authority (SIA); Information Commissioner's Office (ICO).
2. Canada: Office of the Privacy Commissioner of Canada (OPC);
3. Australia: Federal Authority: Office of the Australian Information Commissioner (OAIC);
4. New Zealand: Office of the Privacy Commissioner (OPC);
5. Malaysia: Personal Data Protection Department (JPDP);
6. EU: European Data Protection Board (EDPB);
7. United States: The Federal Trade Commission (FTC).
