

Torpedopot - Self-watering Planter . Be prepared to never water your plants again.

Fill with soil, attach
Manifold, and turn
knob to start watering

Add seeds or seedlings

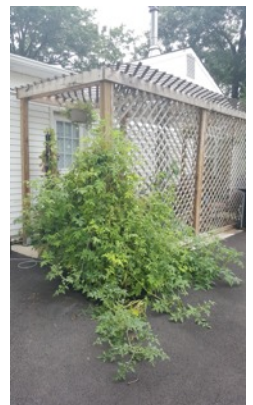

Germination: 70 Tomato seeds

1,000 Tomatoes

16 ft wide 10 ft high

Let your Torpedopot water your seeds for you. You do not have to purchase a separate germination tank to grow your seeds only to move them into your garden. With the Vertical Torpedopot, Just push your seeds into the 1/1/2 in perch holes in the walls of the Vertical Torpedo, turn on the water to the appropriate wetness and walk away.

The Torpedopot© is a game changer! The Torpedopot© is a self-watering planter that allows you to control the amount of water and nutrients to your plants. Each Torpedopot© has a flow control so that you can adjust the water and nutritional intake. You can determine your plant's feeding schedule based on the type of plants in your planter, amount of plants, seasonal changes, growth/life cycle, and fertilization requirements. You do not have to worry about over-watering or under-watering your plants because the Torpedopot© does the watering for you. Your plants receive fresh, clean non-standing water. They drink what you drink.

\$25 for any size Curved Planter
