Whitepaper Version 1.0 — September 21, 2025

1. Overview

INFINITE COIN USD (INF_USDT) is an ERC-20 utility token designed for a mobile-first wallet experience and transparent treasury operations. The project emphasizes real-yield economics: no new token inflation is used to pay rewards. Instead, a portion of net product revenue can be routed to a staking vault and/or liquidity operations.

Token Name	INFINITE COIN USD
Symbol	INF_USDT
Standard	ERC-20
Chain	Ethereum (ERC-20)
Contract	0x7A1707AF1c440B99ddd9964950E1d79A07CBD1c4
Decimals	11
Website	https://www.infusdt-infinitecoin.com/

2. Utility & Economics

Utility: INF_USDT unlocks wallet fee discounts, premium features, and eligibility to participate in the real-yield staking vault.

Real-Yield Staking: Net revenue generated by the platform (e.g., swap/on-ramp fees) may be deposited into a dedicated vault and distributed pro-rata to stakers in stable assets (e.g., USDT). This mechanism avoids inflationary emissions.

Liquidity: Treasury deploys concentrated liquidity to PancakeSwap v3/Uniswap-style pools to maintain healthy market depth and low slippage for users.

3. Token Policy & Governance

Key controls (if any) are held via a multi-signature wallet and, where practicable, guarded by a timelock. Major changes (e.g., treasury allocations, vault parameters) are announced publicly with transaction proofs provided through the block explorer. The project avoids any promise of guaranteed returns; distributions are discretionary and depend on realized net revenue.

4. Risks & Disclaimers

Digital assets carry risk, including loss of principal. Smart contracts may contain bugs or be subject to unexpected behavior. Users must independently assess legal and tax considerations in their jurisdiction. This document is for informational purposes only and does not constitute financial advice or an offer of securities.

5. Roadmap (High■Level)

- Real■Yield Vault v1 and transparency dashboard.
- Wallet integrations (on■ramp, DEX routing) and merchant partnerships.
- Liquidity operations policy disclosure and periodic reports.
- Continuous security review and monitoring.
