Abstract. INFINITE COIN USD is a BEP-20-compatible utility token on BNB Smart Chain (BSC, chainId 56). It powers the INFINITE COIN ecosystem: a mobile-first wallet, treasury visibility, and DEX interoperability. The token features 11 decimals, a fixed premint of 2,287,098,975.87 to a public treasury address, and a time-boxed transfer window (180 days) with a controllable extension by the on-chain owner.

Contract (checksum)	0xA7C3975fA0C55442A11f720b6664b451EE20f0ED
Symbol	INF_USDT
Name	INFINITE COIN USD
Decimals	11

1. Overview

Ticker: INF_USDT **Name:** INFINITE COIN USD **Standard:** BEP-20 (ERC-20 equivalent) **Chain:** BSC (56) **Decimals:** 11 **Premint:** 2,287,098,975.87

INFINITE COIN focuses on user-friendly wallet UX, live market views, and transparent treasury tracking.

2. Contract Specification

The reference implementation follows standard ERC-20 interfaces with minimal custom logic:

- **Lifespan control:** transfers and approvals are permitted only while *live()* is true. The contract activates at deployment (*activatedAt*) and remains live for 180 days (*DURATION*). The owner may call *extend(uint256 extraSeconds)* to extend the window.
- **Ownership:** Ownable with *transferOwnership(address)*.
- **No fees / no reflections / no additional mint/burn** beyond initial premint.

2.1 Function Selectors (for reference)

```
totalSupply() 0x18160ddd balanceOf(address) 0x70a08231 transfer(address,uint256) 0xa9059cbb  
allowance(address,address) 0xdd62ed3e approve(address,uint256) 0x095ea7b3  
transferFrom(address,address,uint256) 0x23b872dd live() 0x4fa3f98e expiry() 0x4f7e9d7a  
extend(uint256) 0x0e8bf373 name() 0x06fdde03 symbol() 0x95d89b41 decimals() 0x313ce567  
owner() 0x8da5cb5b transferOwnership(address) 0xf2fde38b
```

3. Token Economics

Supply: fixed at deployment (no further mint). **Premint:** 2,287,098,975.87 credited to the treasury (0xd65BFFBE8d9Be91bfdDEBe71178B71BECE9523FC) for ecosystem ops, liquidity, and partnerships. No tax mechanics; pricing/liquidity are market-driven on DEXs/CEXs.

Suggested treasury policy: Liquidity on PancakeSwap (BSC) pairing **INF_USDT/USDT**; gradual releases with on-chain proof; community incentives with spending caps.

4. Utilities & Integrations

- Wallet dApp: live treasury panel (watch-only), QR receive, market trends.
- DEX: Swap & liquidity via 1inch / PancakeSwap deep links.
- Explorers: BscScan verified source + token logo.
- Tokenlists: Public JSON for dApp discoverability.

5. Roadmap

Q1: Token verification (BscScan), Trust Wallet logo PR, domain/docs live.

Q2: Mobile UX upgrades (QR, auto-refresh), liquidity bootstrap, partner integrations.

Q3: Analytics dashboards, staking/points (off-chain), more on-ramps.

Q4: Transparency reports; additional ecosystem apps.

6. Security Notes

Minimal attack surface (no complex tokenomics). Standard allowance handling; no custom authorization. Owner can only extend transfer window and transfer ownership; no privileged mint/burn. Independent audits recommended for future upgrades.

Risk Statement

Digital assets are volatile and may result in total loss. This document is informational and not financial, legal, or investment advice. Users must conduct their own research and comply with local regulations.

7. Compliance & Disclosures

INF_USDT is a utility token for access/interactions within the INFINITE COIN ecosystem. No promise of profit; not an investment contract. Regional restrictions may apply; adhere to KYC/AML obligations on onramps.
