

We Use a Shared Medical Record in South Georgian Bay

Your medical record is part of a shared system that connects many healthcare providers in our area. This helps ensure you get faster, safer, and better care, because your care team has the right information at the right time.

Only people involved in your care are allowed to look at your health record. We follow strict rules under Ontario's health privacy law (PHIPA) to keep your information safe.

We understand that some visits can feel sensitive or personal. If you have any concerns about your visit today, please speak with your healthcare provider.

We are here to support you.

If you wish to contact the Privacy Coordinator for more information, please email privacy@gbfht.ca.
