**Accelerated
Patient Demand
for Ibogaine**

**The Clinical
Capability Gap**
(Clinics lack specialized
technology & specialized labor)

Float Telehealth provides the pre-built bridge to bypass this bottleneck, enabling rapid, safe deployment.

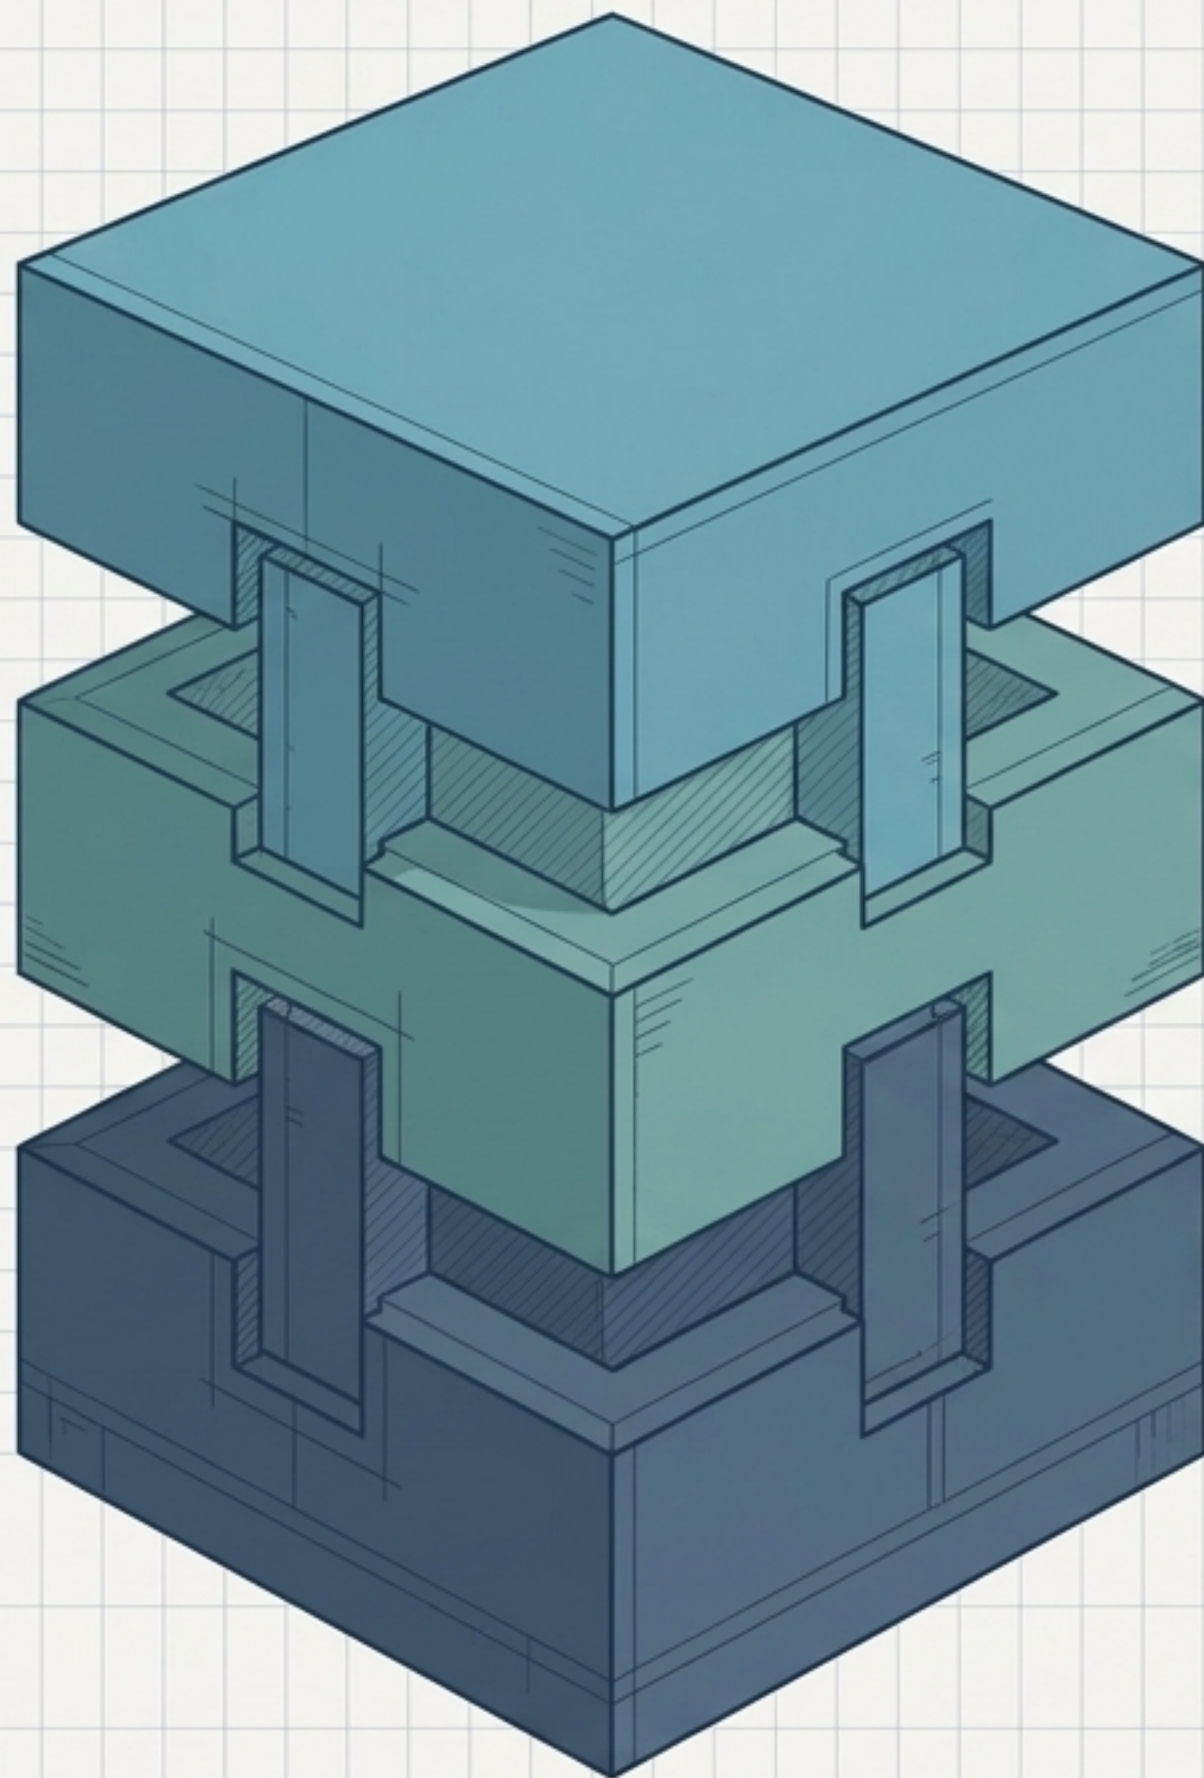

The Old Way

Owning clinics. Characterized by high friction, massive overhead, and real estate liabilities.

The Float Way

The 'Intel Inside' for the psychedelic mental health revolution. We provide the high-margin, scalable service layer. We don't compete with clinics; we empower them.

The Boots: Specialized Facilitator Staffing

Deployment of highly trained, “top-of-license” facilitators (on-site or virtual) to manage delicate psychedelic experiences.

The Brain: The HIPAA-Cloud Stack

AI-driven intake engine and automated clinical note generation, instantly pre-configured for the partner clinic’s existing EMR.

The System: 24/7 Remote Monitoring

Our “Sentinel AI” provides a continuous post-session safety net, enabling round-the-clock care without the clinic hiring extra night staff.

The Clinic Partner

Float Telehealth

Infrastructure

Provides the physical space & state licensing

Provides the specialized Facilitator & AI Sentinel.

Care Delivery

Performs the medical prescribing & patient diagnosis

Performs the Screening, Facilitation & Integration

Financials

Bills the insurance network or patient directly

Receives a recurring Service Fee for technology and labor.

Zero Learning Curve

Transform a traditional practice into an advanced psychedelic mental health wing in weeks, not years. True plug-and-play capability.

Reduced Liability

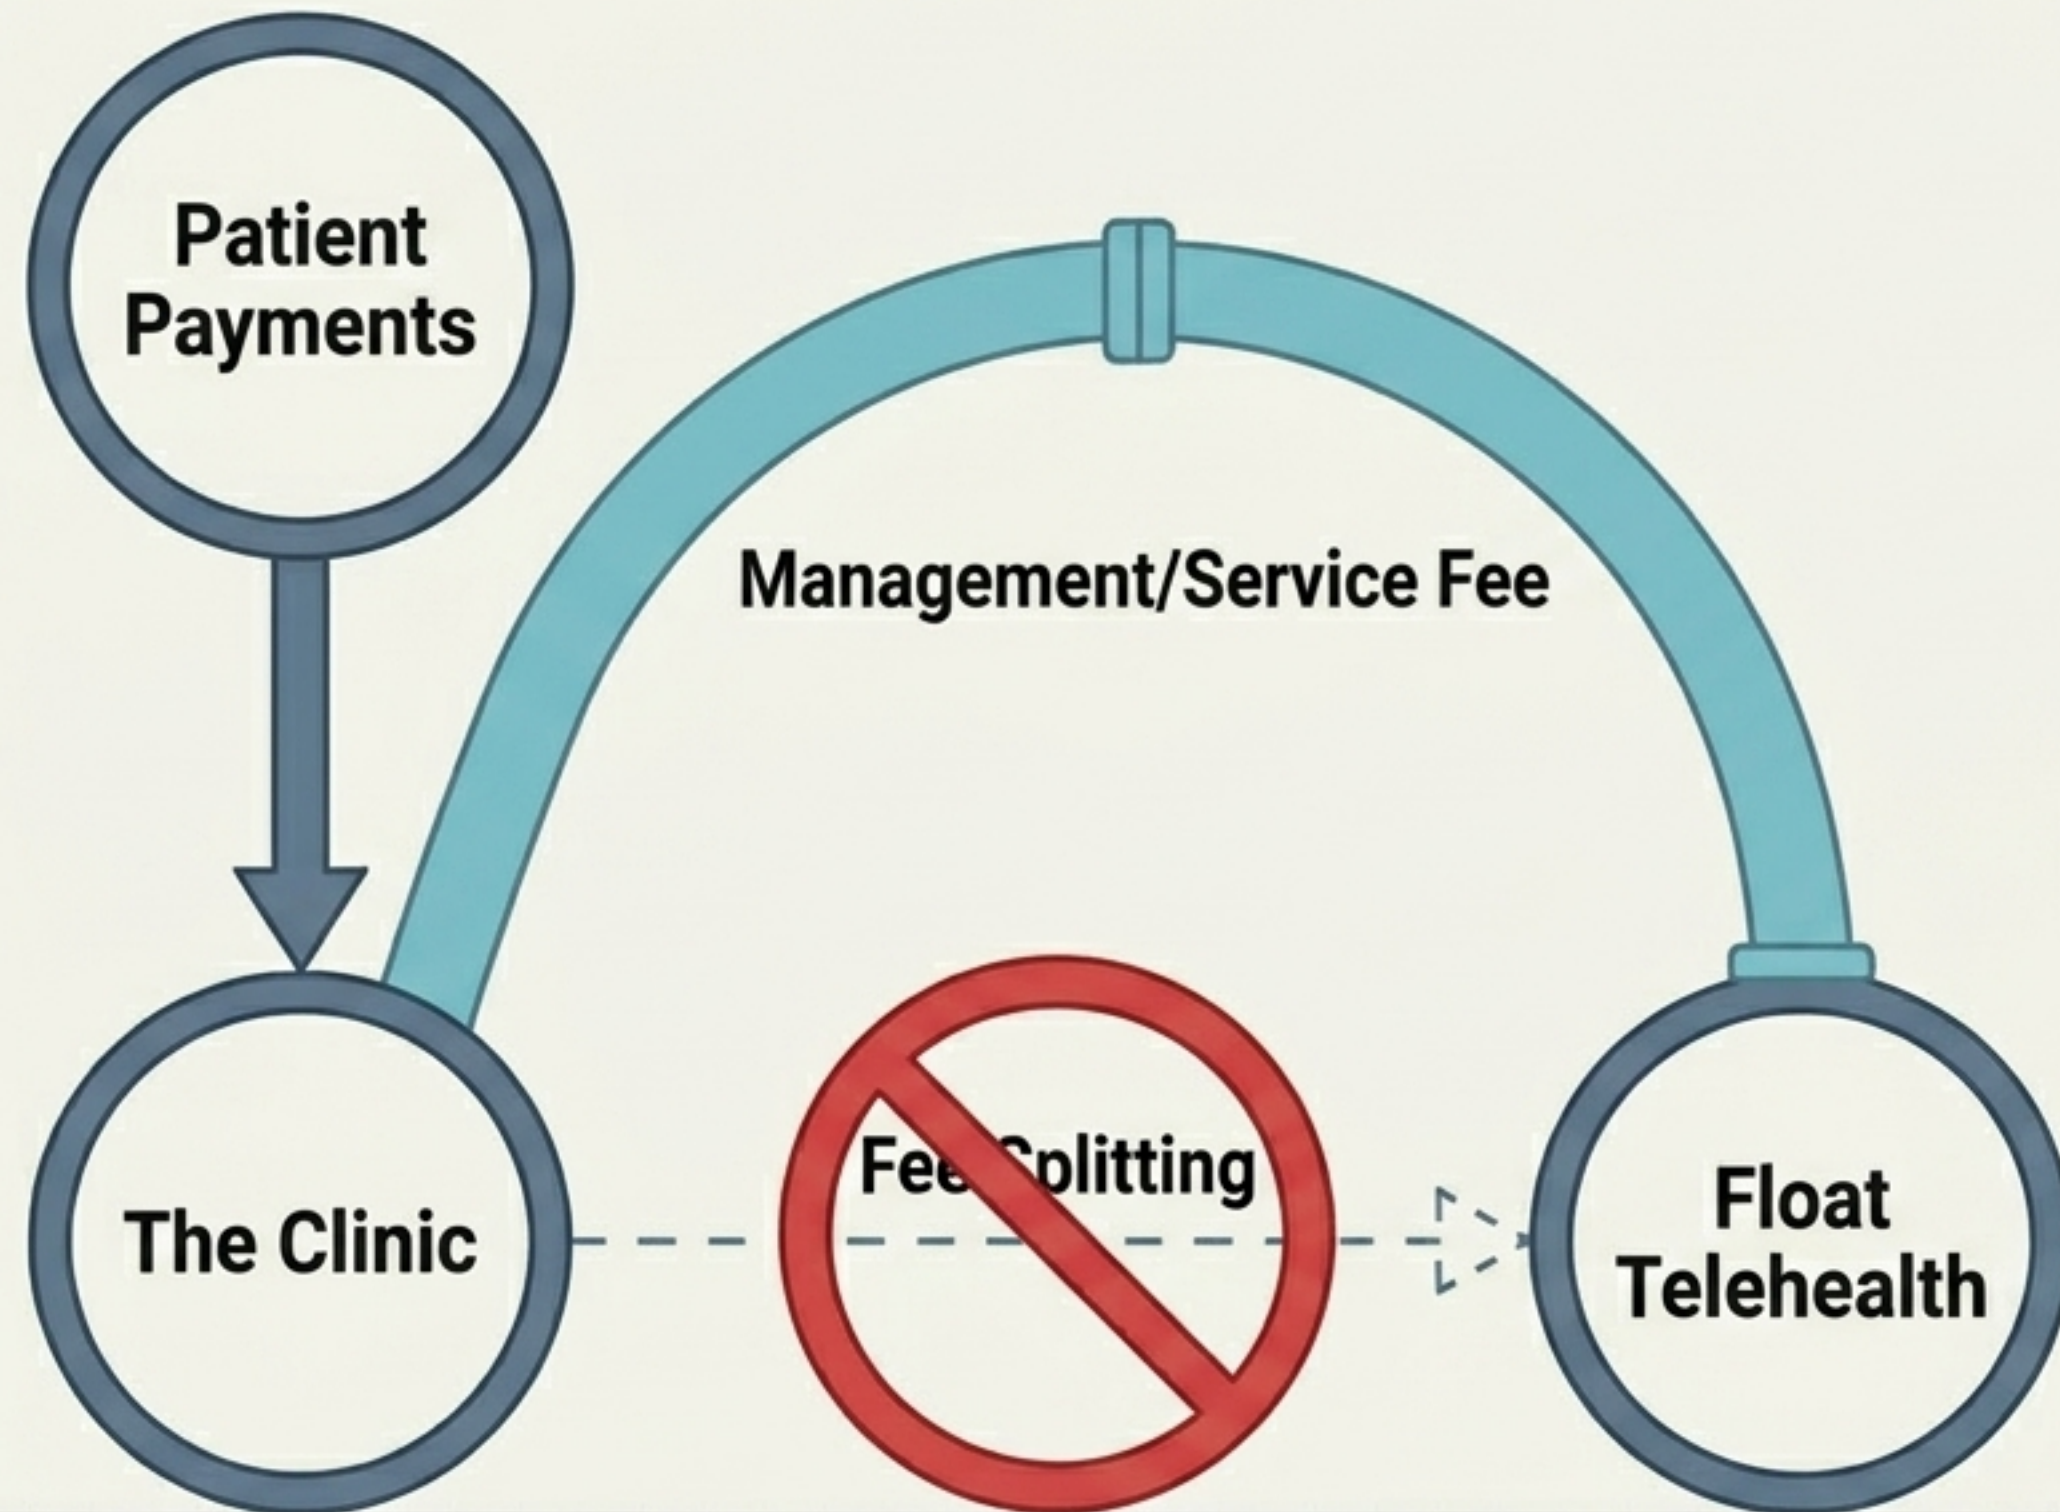

AI-driven monitoring establishes a standard of care and documentation far exceeding traditional manual clinics.

High Margin Volume

Leveraging the 'Virtual Supervision' model (under their medical director) maximizes patient throughput while keeping overhead drastically low.

Revenue Compliance Architecture

2026 Florida Strategy:

Built strictly in accordance with 2026 Florida Telehealth statutes.

Service Fee vs. Revenue Share:

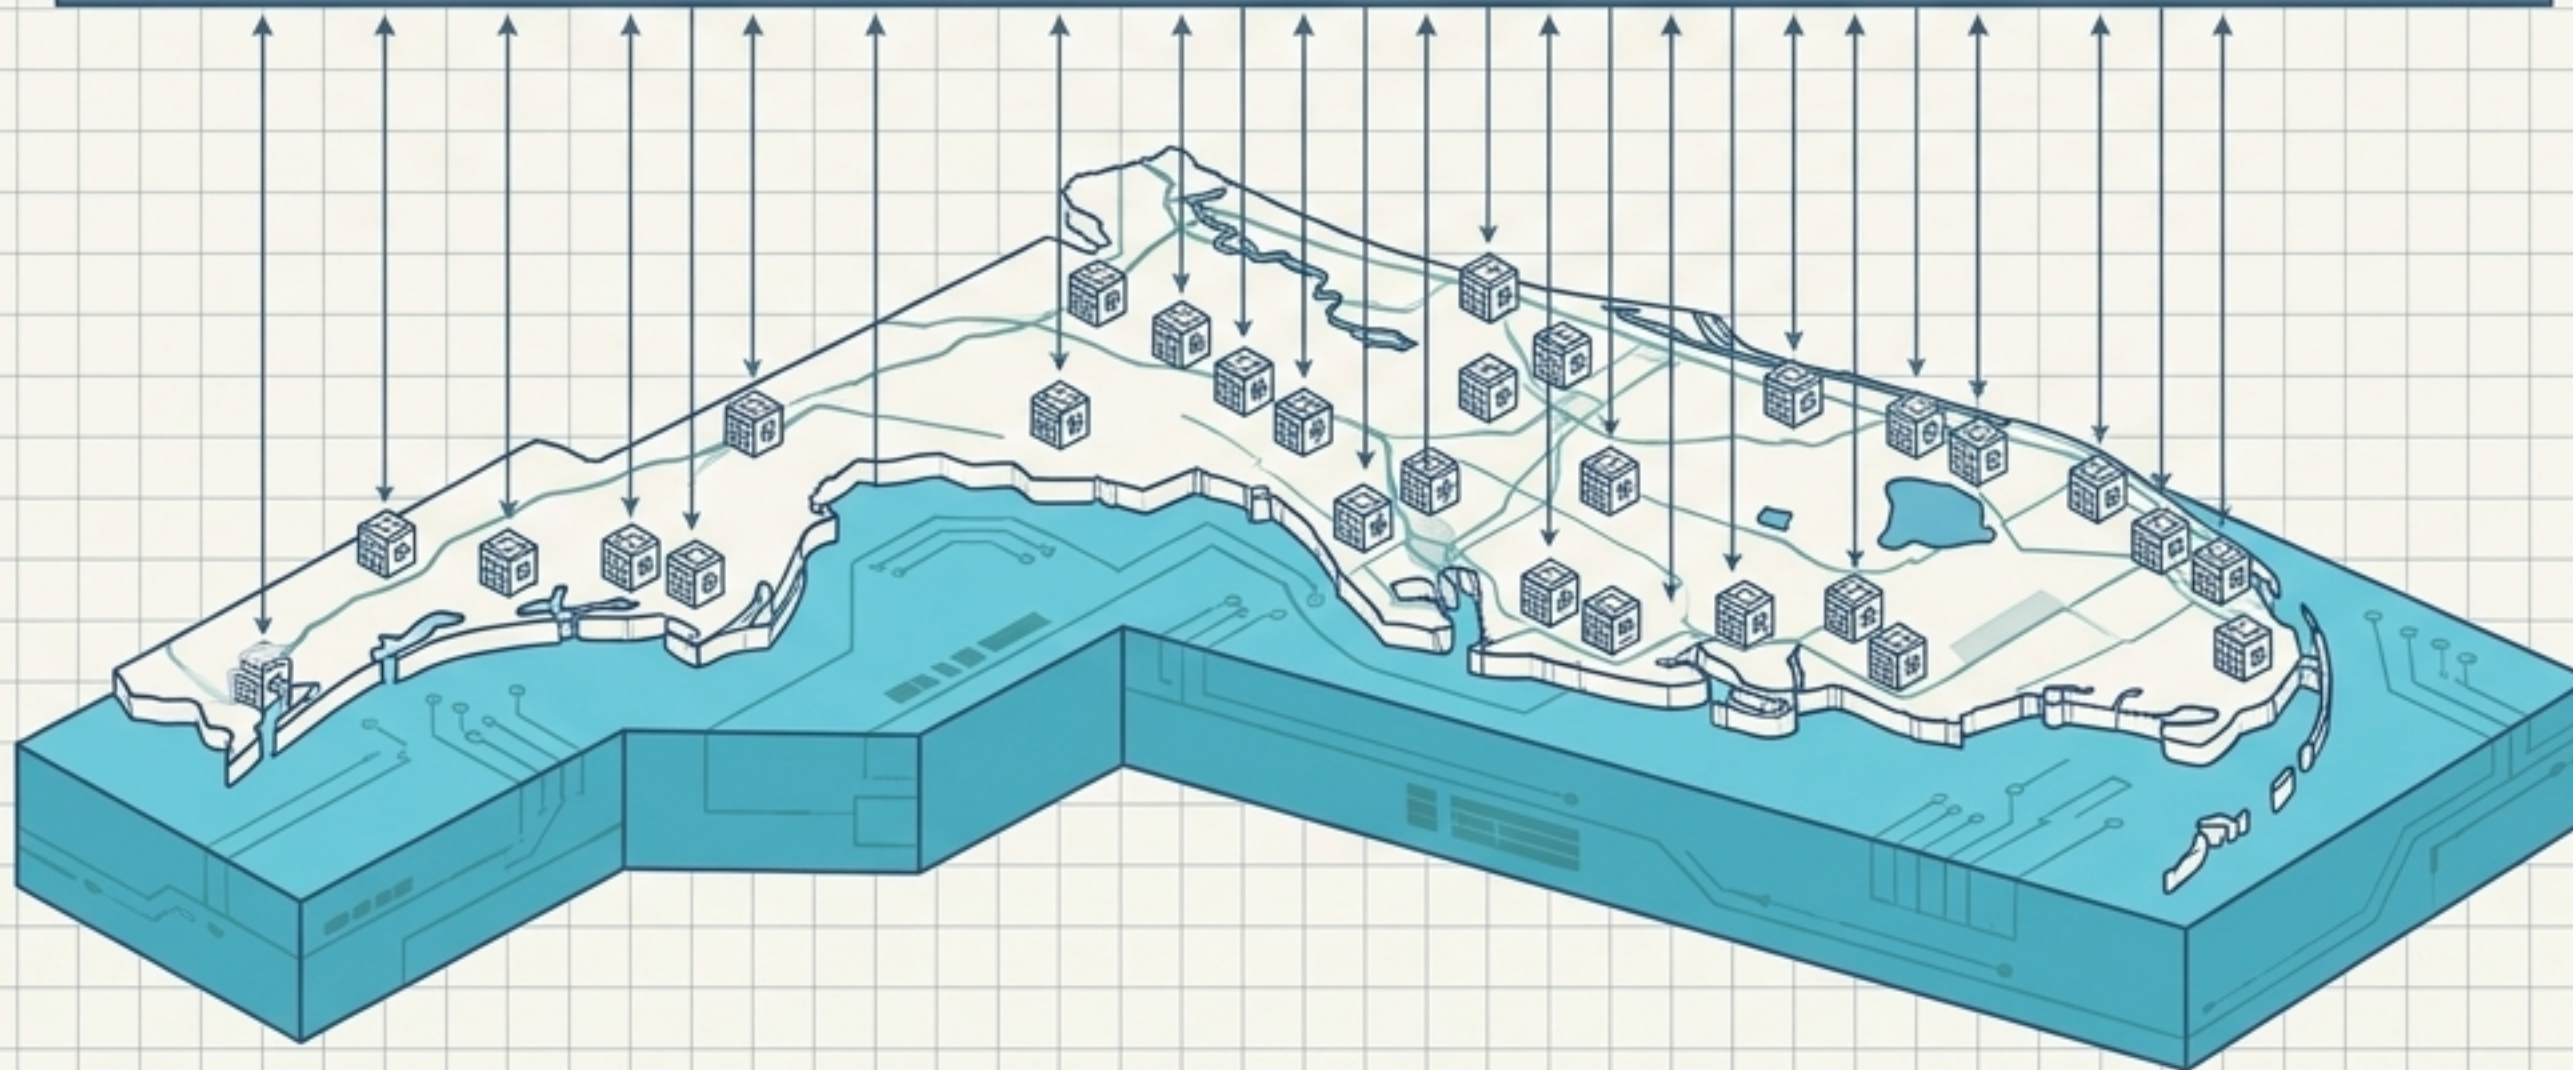

Income is structurally categorized as a 'Management/Service Fee' for technology and facilitation labor.

The Moat:

This structure completely bypasses 'fee-splitting' liabilities while capturing high-margin, predictable, recurring B2B revenue.

The Turnkey Future of Psychedelic Medicine

The upcoming psychedelic integration won't be won by the company building the most clinics. It will be won by the company powering all of them.

Float Telehealth provides the essential Brain, Boots, and System to make every medical clinic in South Florida instantly capable of providing the world's most advanced mental health treatments.
