

The Infrastructure for Modern Healing

A Turnkey Facilitator & Technology Suite for Medical Clinics.

The Catalyst: The April 18 Executive Order

The recent fast-tracking of Ibogaine therapy has created an immediate inflection point. Clinics across Florida are scrambling to capture patient demand, but face immense structural bottlenecks in attempting to offer these treatments safely.

April 18 Executive Order

Patient Demand

The Clinical Bottleneck

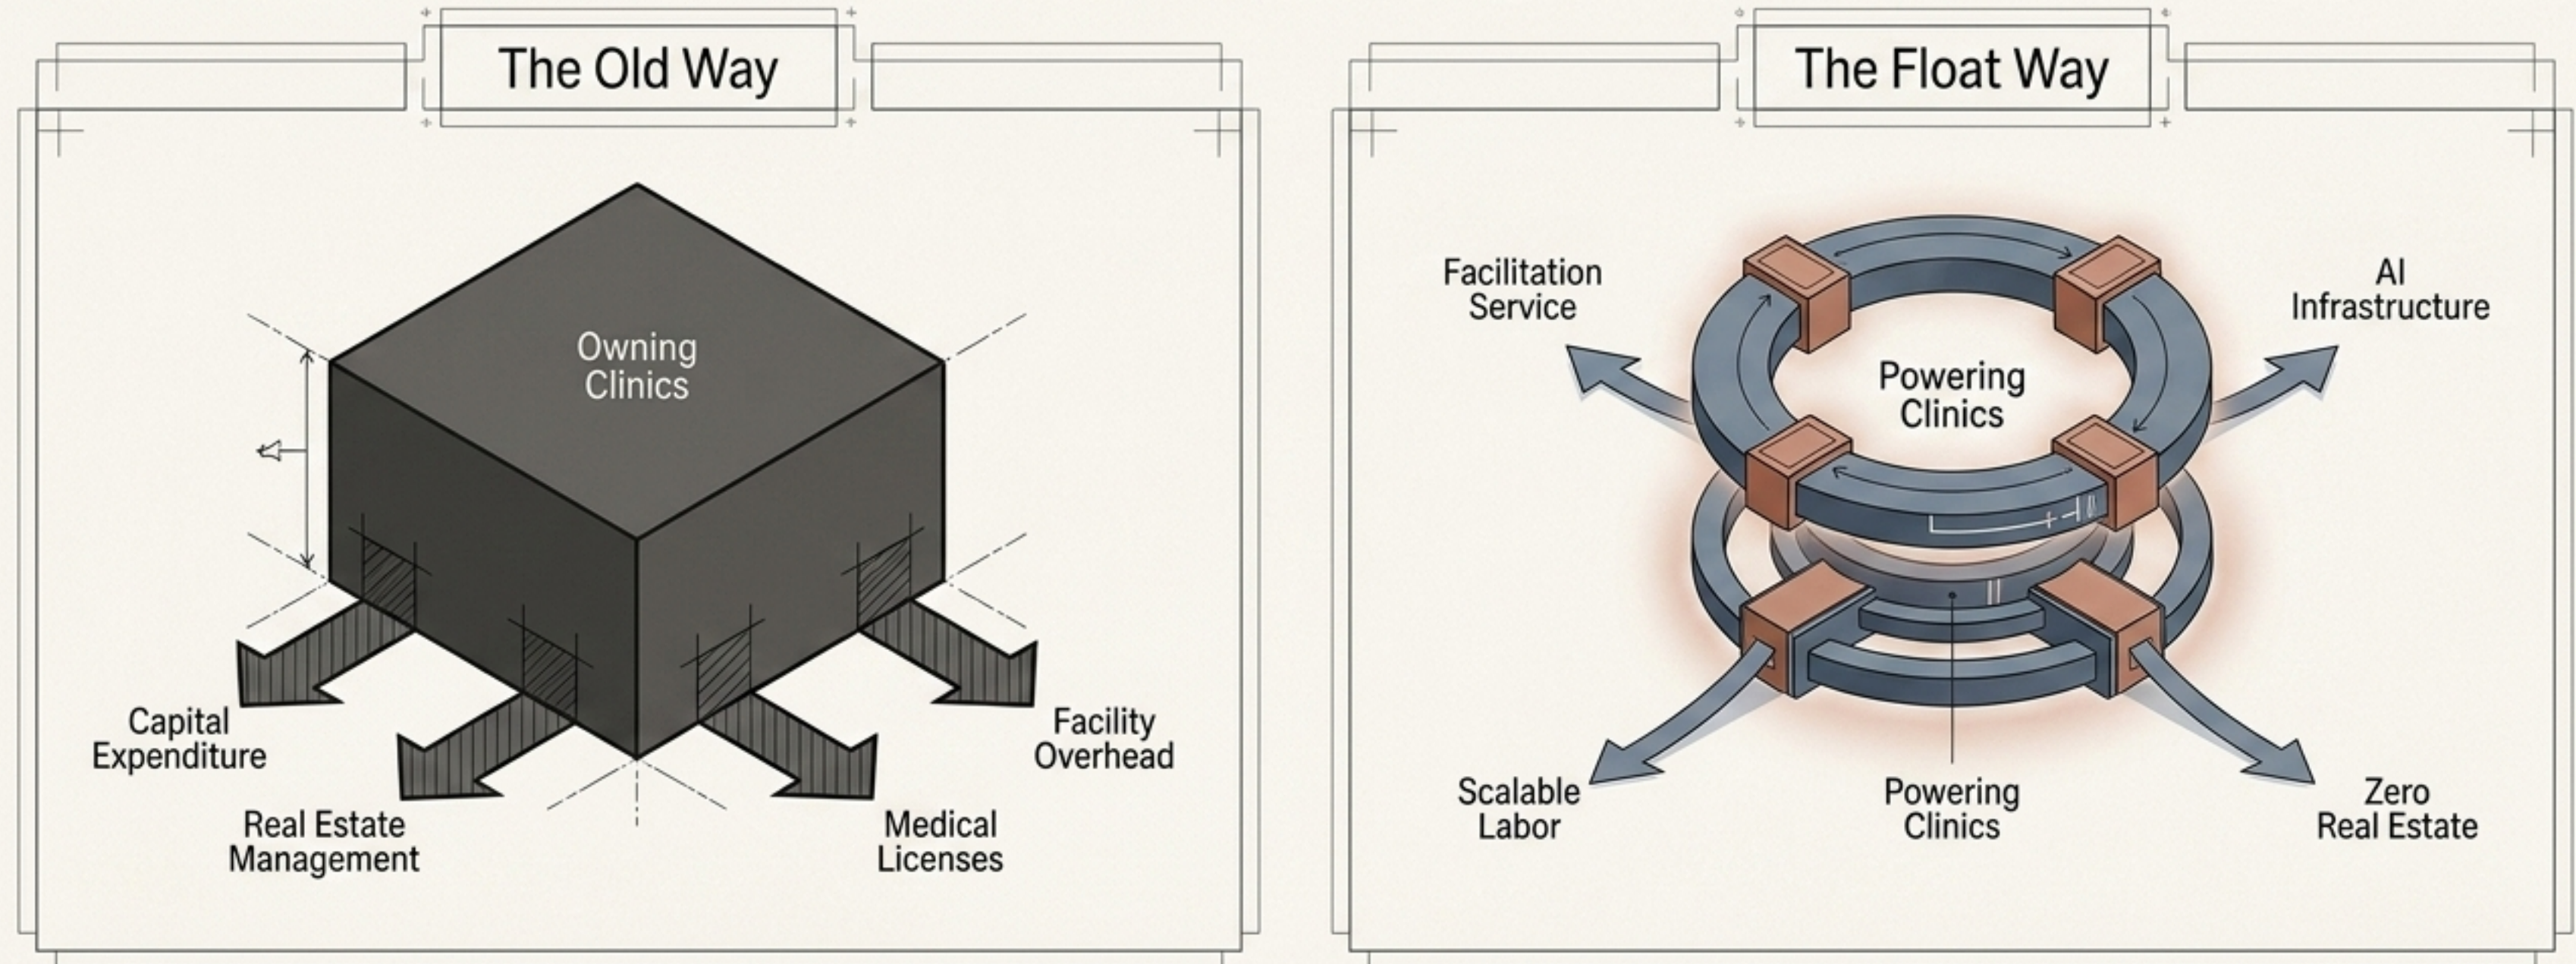

Liability & Risk Management

Specialized Facilitator Shortages

Overnight Patient Monitoring Requirements

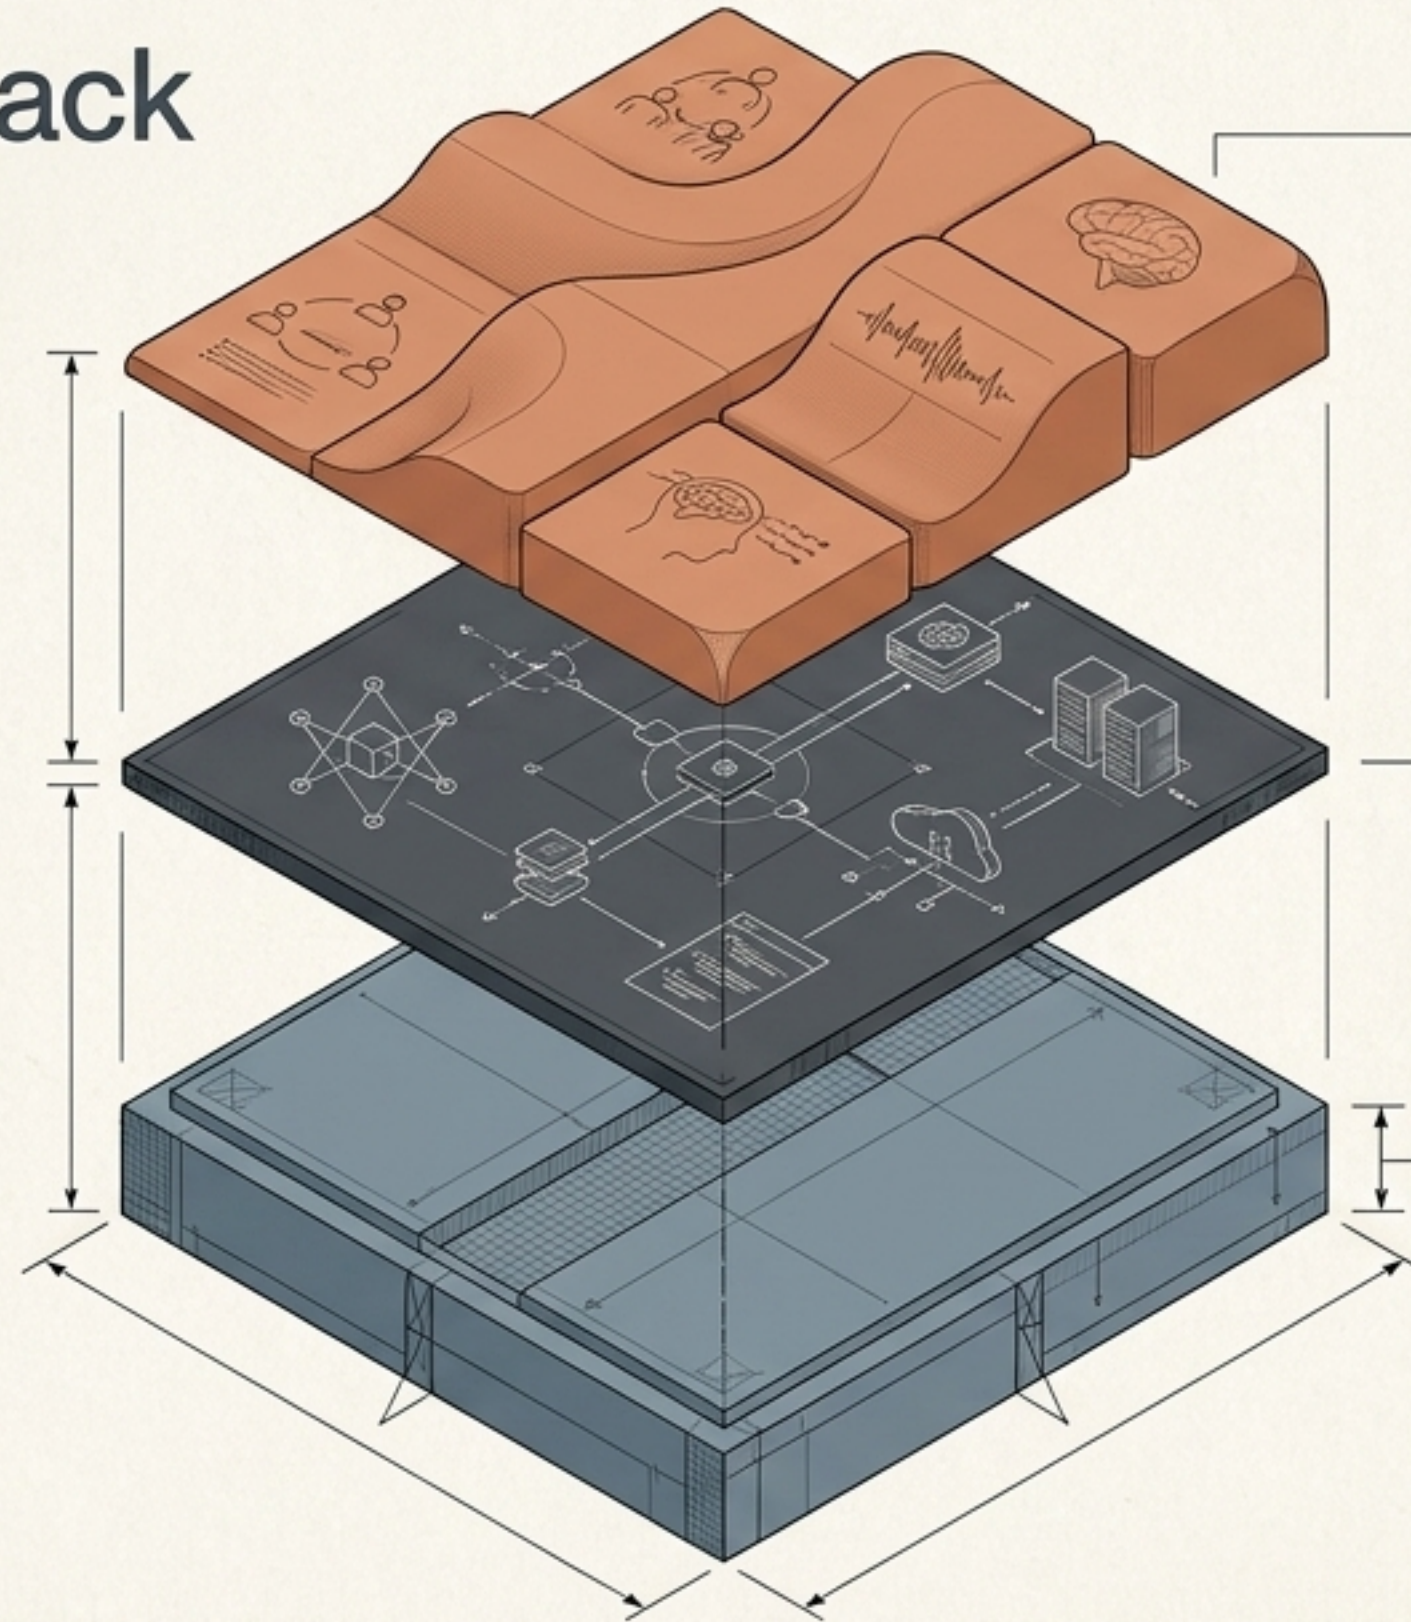

Powering the Revolution, Not Owning the Real Estate

We are the “Intel Inside” for the psychedelic mental health revolution. Float operates as a highly scalable Management Services Organization (MSO). We provide the critical brain, boots on the ground, and 24/7 systems as a plug-and-play service layer.

The Float Infrastructure Stack

A unified system of top-of-license human care and automated technological oversight, seamlessly integrated into existing clinical environments.

Specialized Facilitators

Trained, top-of-license professionals deployed directly to the clinic or virtually to manage the delicate Ketamine or Ibogaine experience.

The HIPAA-Cloud Stack

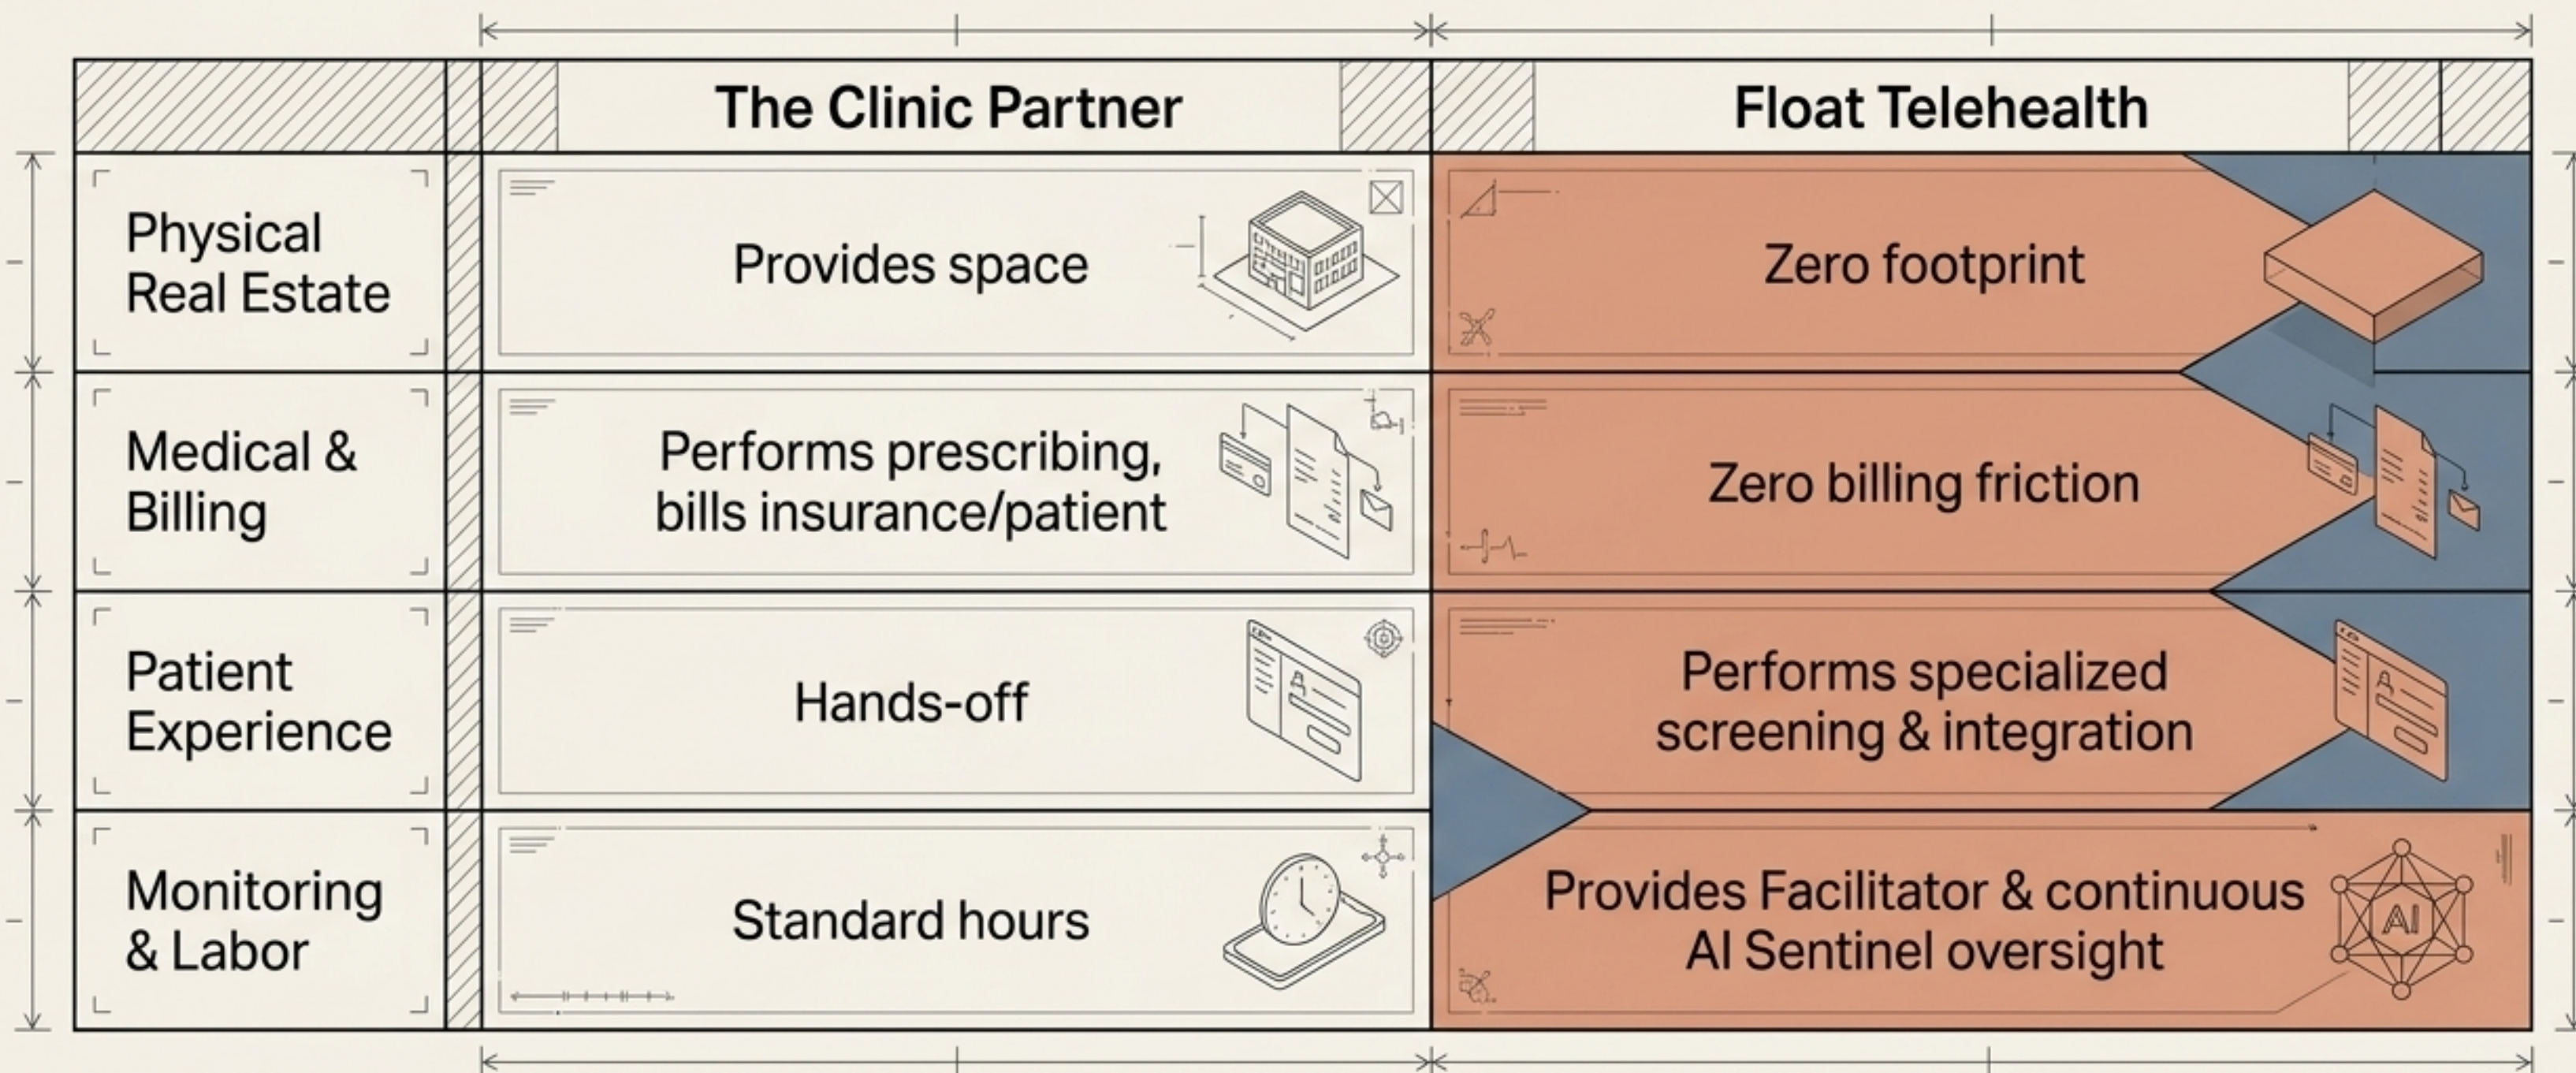

An AI-driven intake engine and automated clinical note generation layer, pre-configured to snap perfectly into the partner clinic's existing EMR.

Sentinel AI

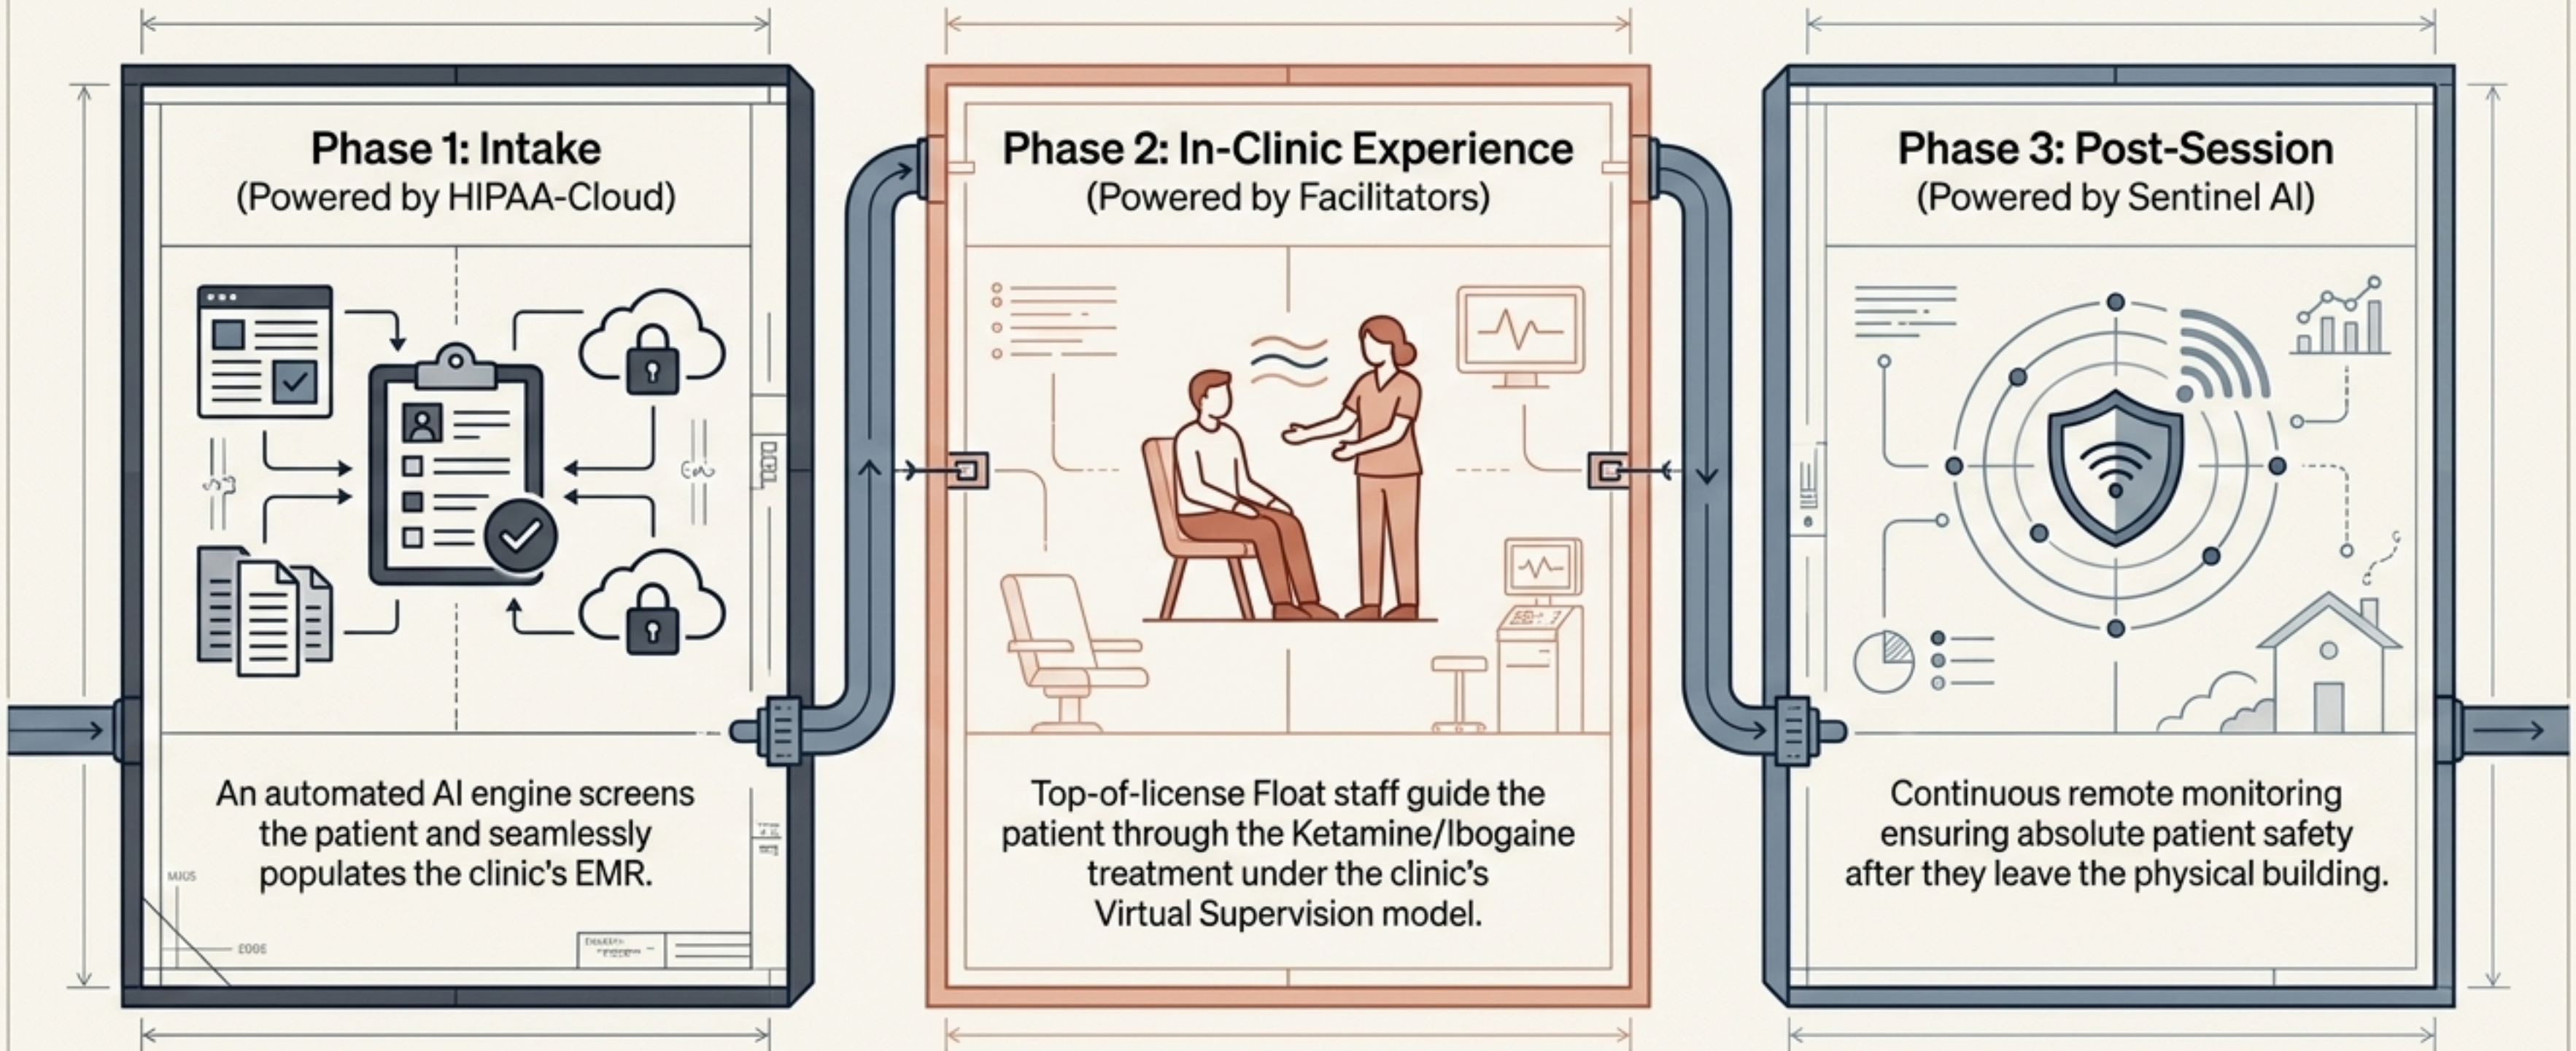

The foundational 24/7 remote monitoring safety net that provides round-the-clock care without extra night staff.

The Clinical Partnership Division of Labor

We do not compete with clinics; we empower them. By absorbing the high-friction operational elements, we allow the medical director to maximize patient volume through Virtual Supervision.

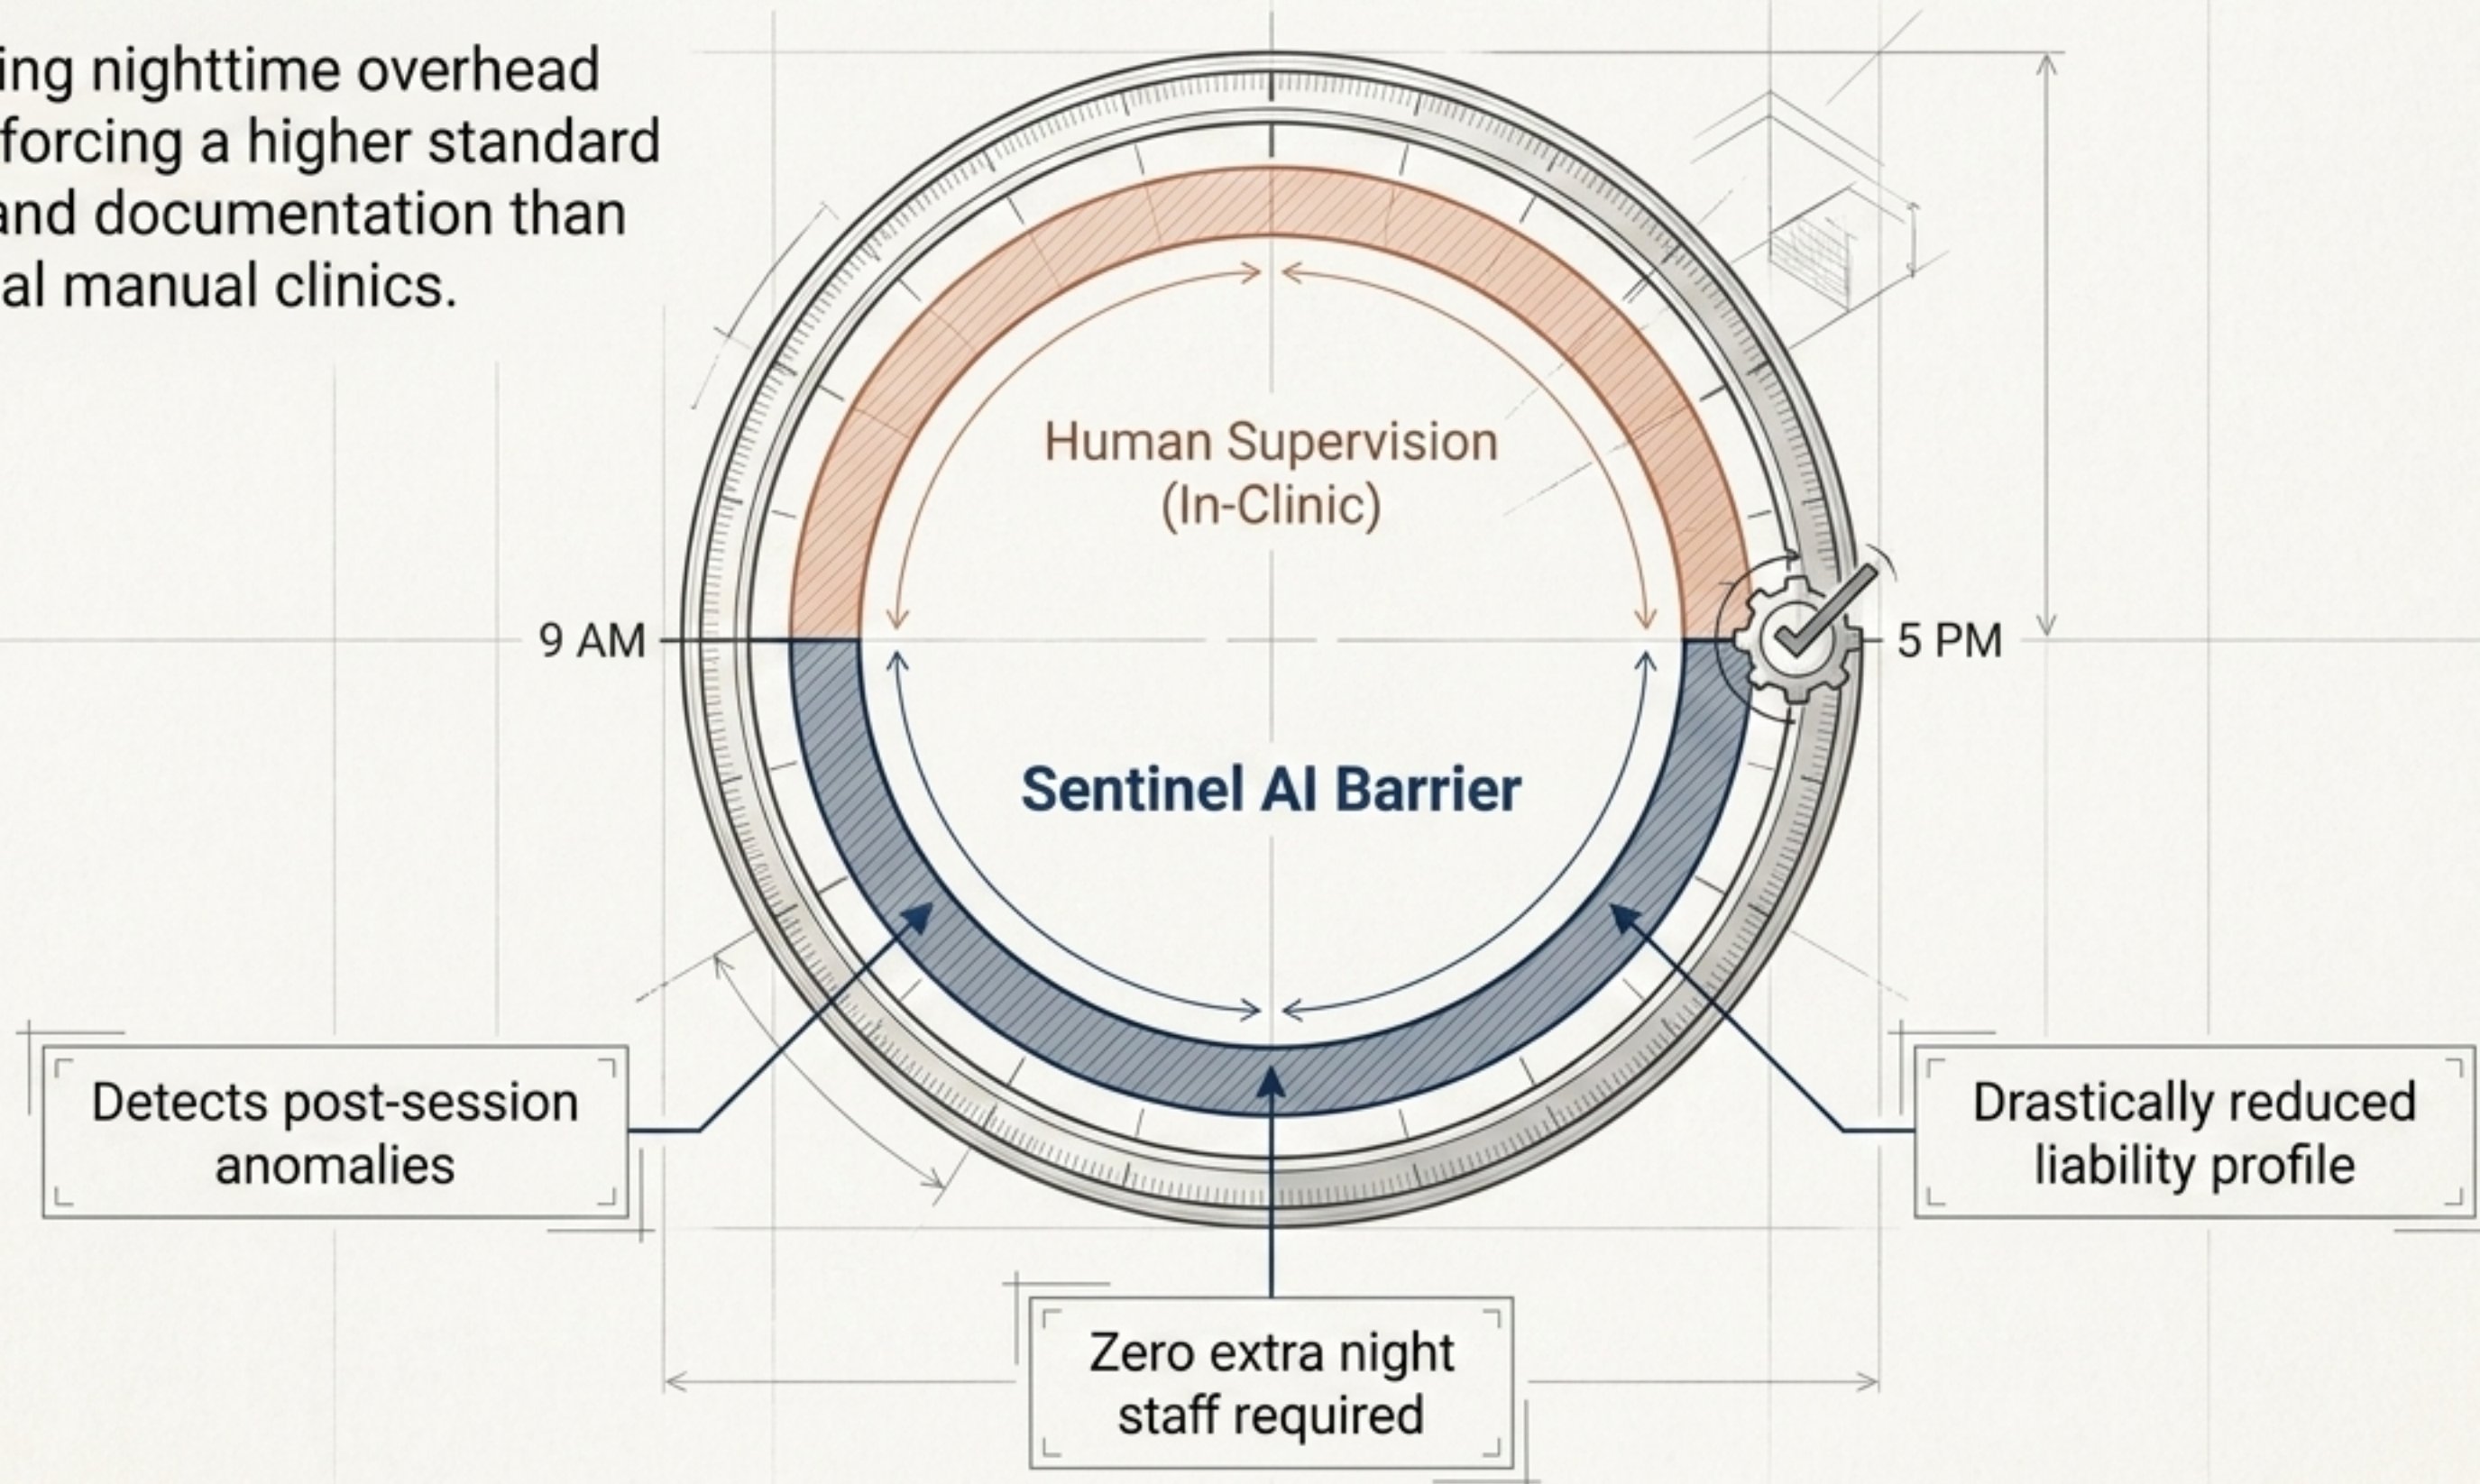

The Patient Journey Architecture

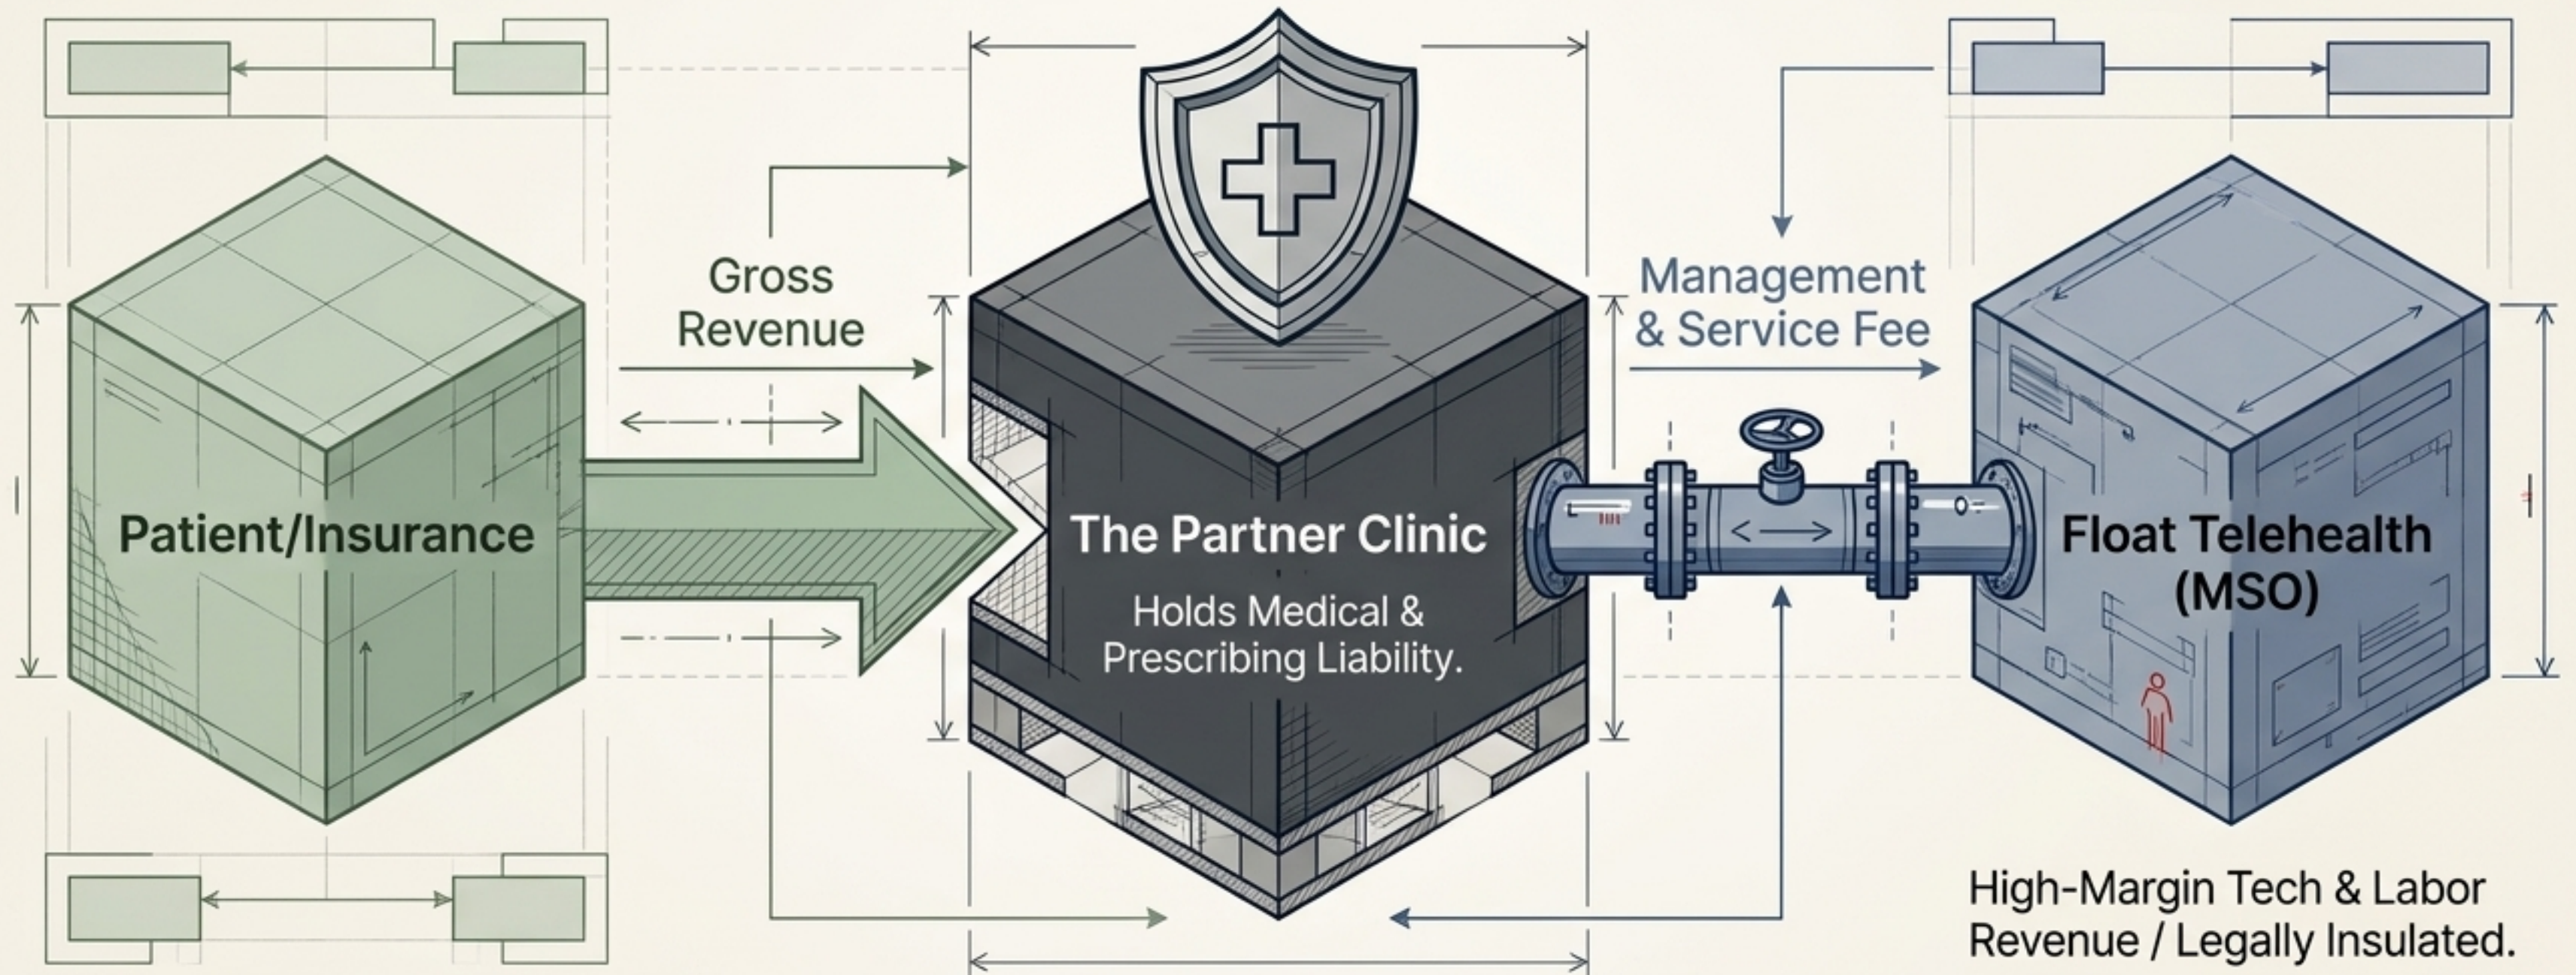

The Sentinel Safety Net

Eliminating nighttime overhead while enforcing a higher standard of care and documentation than traditional manual clinics.

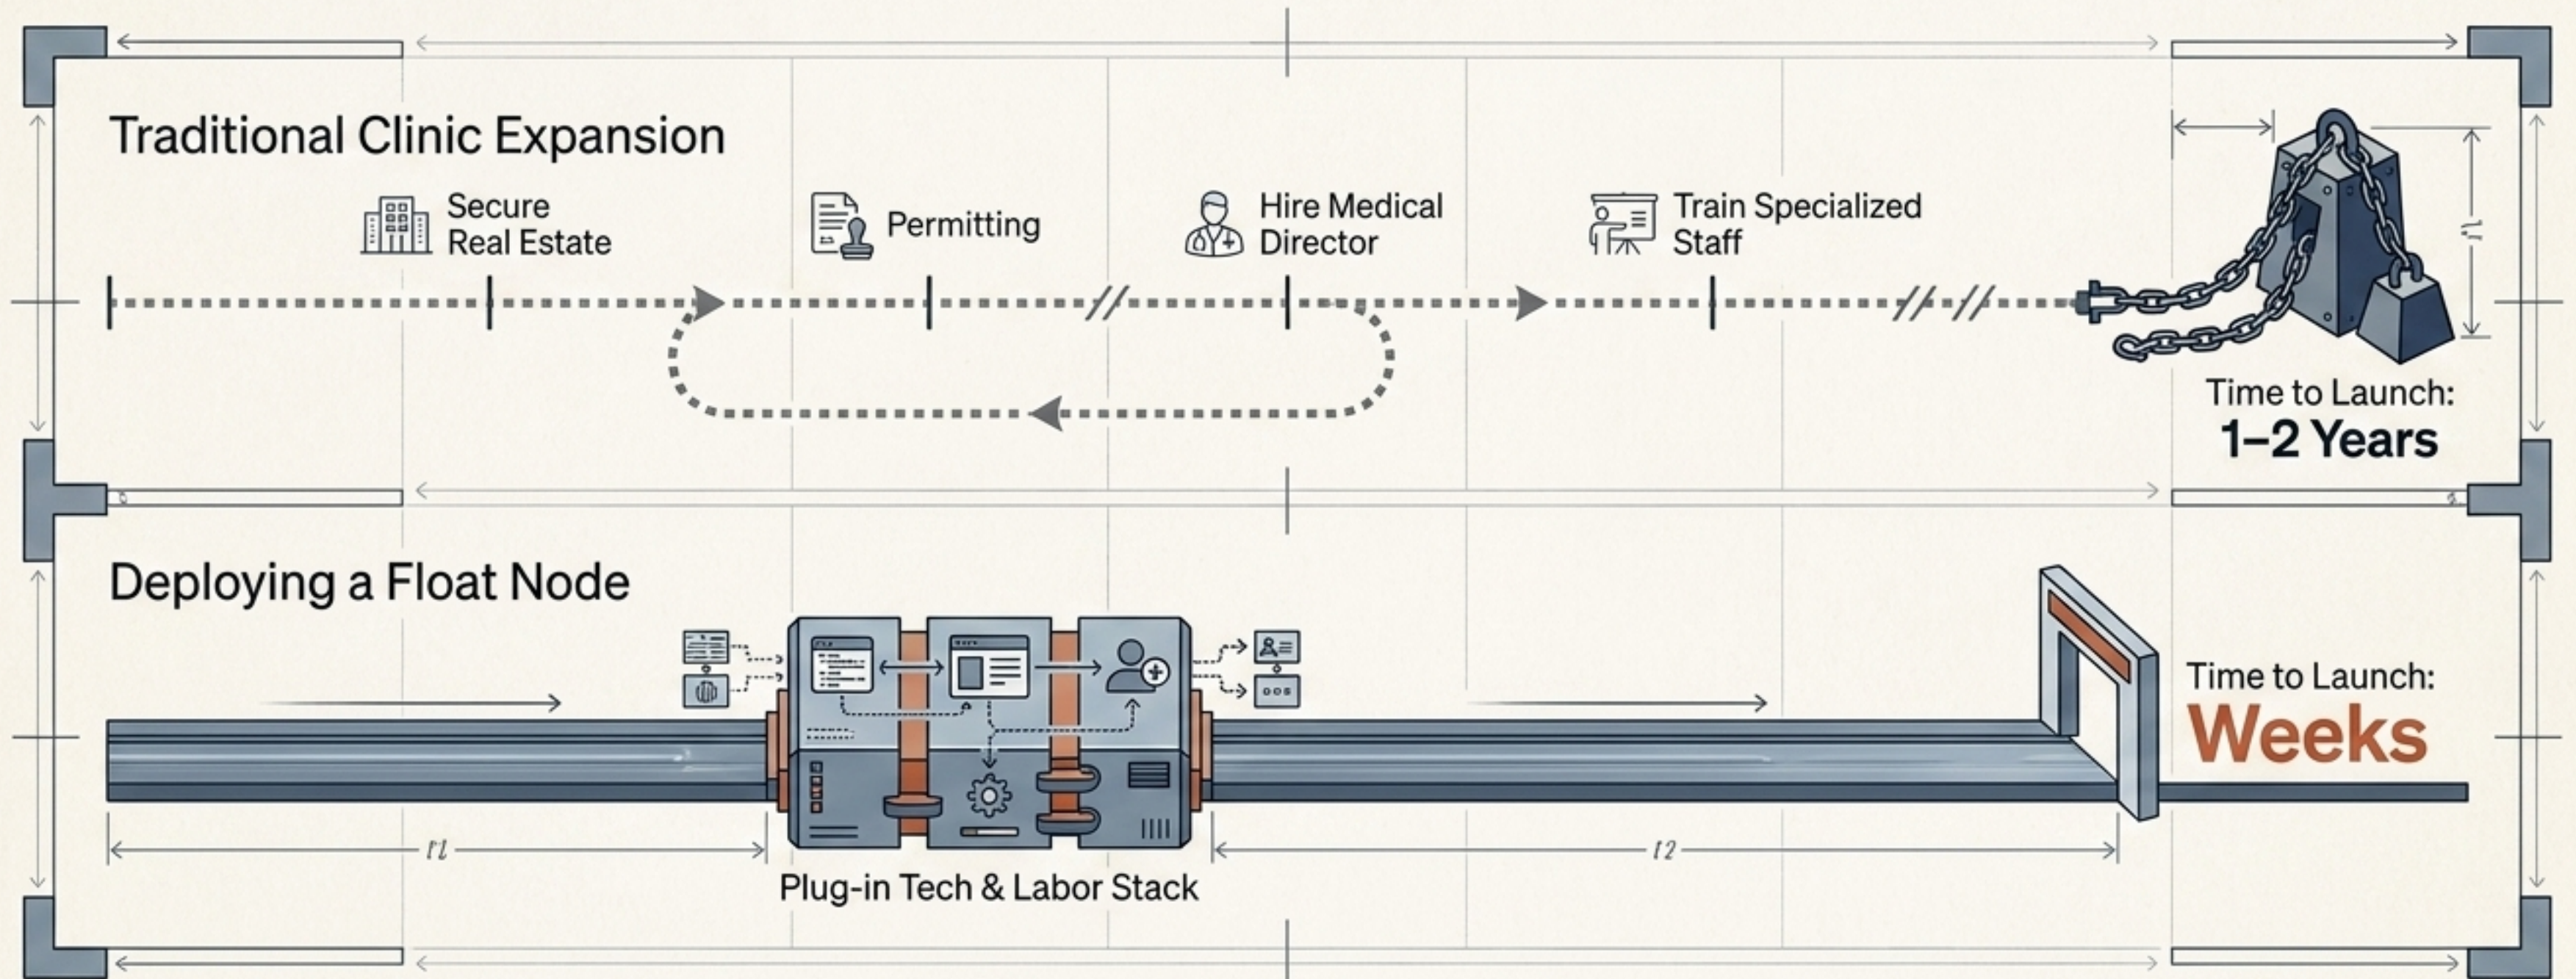

Insulated Liability, Compliant Economics

Engineered specifically for the 2026 Florida Telehealth statutes. Our financial model completely avoids high-risk “fee-splitting” in favor of a clean, legally defensible B2B structure.

The Advantage of Turnkey Scalability

Because Float holds no medical licenses and builds no physical real estate, we can deploy mental health infrastructure across South Florida at a fraction of traditional time and capital costs.

The Unfair Advantage for Modern Clinics
