

# Big Cedar Creek Ranch & Whispering Willows Ranch Puppy Care

Nemex 2 - \_\_\_\_\_

Panacur \_\_\_\_\_

Vaccine- \_\_\_\_\_ - Spectra 5- Canine Distemper-  
Adenovirus Type2- Parainfluenza- Parvovirus

\_\_\_\_\_ examined your puppy \_\_\_\_\_

Puppies where checked for any congenital abnormalities, hernias, cleft palate, heart murmurs, ears, eyes , throat, and parasites. We do not guarantee typical puppy parasites including worms, giardia, coccidia even though your puppy has been wormed regularly they do have gestation cycles, So I suggest regular worming tests on your vet visits and following your vets worming protocol .

Puppies where fed \_\_\_\_\_

chicken based , highly recommended by veterinarians  
Feel free to choose your own puppy food but please no can food and slowly introduce the new food mixed with what they are used to. Puppies are on a free feeding program but please monitor, puppies can eat to much to fast at first and can cause bloat. Soaking their kibble in hot water until its soft is fine for a few days.

Your puppy LOVES toys, but again make sure they are safe and nothing they can tear apart and swallow. Only nylabones, no rawhide bones ect.

NO Parks, Pet stores or any friends/family dogs visiting until your puppy completes his/her entire series of vaccines. DO NOT set your puppy on the floor of even your vet visit, Only on the sanitized table. Parvo has a 10 incubation and puppies can easily contract it.

Your puppy will come with a toy with his/her siblings scent along with mommies to help them adjust. But please remember they will be in a new environment so please do not over stimulate.

PLEASE schedule your puppy for a well puppy visit within 3 days of picking up your puppy so your vet can meet your new addition and confirm Dr Tuley's examination of health. If your veterinarians congenital exam conflicts with \_\_\_\_\_ we will need to be notified within the 3 days with your vet report if there is a LIFE threatening congenital health issue found in that report we will have the puppy returned us, if out of state transporting is at your expense, then you will be refunded the purchase price of your puppy, if defects found after 3 days up to 1 year we only offer a replacement puppy when one is available.

BCCR & WWR will never be responsible for any vet costs.

IMPORTANT your puppy has just been wormed and vaccinated so please do not repeat until their booster is needed 3-4 weeks from the above vaccinated date. The Above instructions must be followed or you will vacate your health guarantee. Over vaccinating and worming can

be lethal. If you should forego taking your new puppy into your vet for his/her well visit as stated above you will also vacate your health guarantee.

Your puppy has been potty trained with pine shavings this could be continued if you place pine shavings in the area you want him to go potty at avoid cedar shavings.

Your puppy has been microchipped. Please make sure to register your information, Big Cedar Creek is registered as secondary contact.

Trupanion has given Big Cedar Creek's puppy insurance certificate that has to be activated within 24 hours of receiving your puppy.

Upon accepting your new puppy into your home is the binding agreement to our above policies as well as the Puppy Contract you have signed.

Remember this is a curious puppy so please puppy proof inside and outdoor areas, keep poisonous plants and chemicals out of reach, and PLEASE at all times supervise & teach children the proper way to interact with your new puppy.

**WELCOME TO THE BCCR & WWR FAMILY AND ENJOY YOUR NEW FAMILY MEMBER!!**
