Artist Statement

Circles and curves appear throughout my paintings as visual anchors, representing continuity, renewal, and the ongoing nature of growth. Color drives my work. I use it intentionally to shift the emotional tone of a space, to energize and uplift. Whether through layered geometric compositions or more fluid, expressive forms, I create work that engages both visually and emotionally, offering moments of pause and reflection.

An increasingly important element in my work is the idea of play. Play becomes a way of loosening control, allowing for discovery, and new ways of seeing life. It is a necessary part of growth. This balance between intention and play mirrors the human experience. We seek order, but we benefit from moments of spontaneity. We move forward, but rarely in straight lines. My paintings reflect this tension and harmony, inviting viewers to engage with both the structure and the freedom within each piece, and to find joy and a sense of possibility.
