Auto Tracking

AI interaction, multi-gesture control, fast facial recognition & locking tracking

The Solitaire PTK 7080 camera includes an auto-tracking feature, enhancing ease of use and convenience for users. With auto-tracking enabled, the camera can automatically detect and follow subjects or objects within its field of view, ensuring they remain in focus and centered in the frame. This feature is particularly useful for scenarios such as video conferencing, live streaming, or presentations.

Magical Gesture Control

Begin Tracking

Zoom in & Zoom out

Stop Tracking

The Solitaire PTK 7080 camera introduces a magical **gesture control** feature, revolutionizing user interaction for effortless operation. By incorporating gesture control, the Solitaire PTK 7080 camera offers a more intuitive and engaging user experience, empowering users to interact with their camera in a whole new way.

2X Auto Zoom

2X auto zoom can be achieved through gesture

The Solitaire PTK 7080 camera offers a convenient 2X auto zoom feature that can be activated through gesture control during meetings or recordings. This functionality allows users to zoom in on specific subjects or areas of interest without the need for manual adjustment, enhancing the flexibility and usability of the camera in various situations, users can seamlessly zoom in to capture finer details or focus on specific aspects of their content, ensuring that they always get the perfect shot or view during meetings, presentations, or recordings.

8.3 Million Pixel

Ultra HD 4K image quality output up to
3840x2160@30fps, UHD video

Capture every moment in stunning detail with the powerful 8.3 MP camera of the Solitaire PTK 7080. From vibrant landscapes to intricate close-ups, experience crystal-clear images that bring your memories to life.

Double Brushless Motor

Double brushless motor two-axis drive, image stabilization
six-axis gyroscope and maximum 120°/S control speed

This setup boasts a double brushless motor two-axis drive, paired with image stabilization featuring a six-axis gyroscope, offering precise control and stability. With a maximum control speed of up to 120° per second, it ensures smooth and rapid adjustments to capture clear and steady images or footage, enabling users to capture high-quality content with minimal shake or blur, even in dynamic and fast-paced environments.

Dual Microphones

With the Noise Reduction Algorithm

Dual microphones with noise reduction algorithms capture audio from different angles, process signals in real-time, and cancel out unwanted noise. Choose this setup for enhanced audio quality and clear communication in noisy environments.

Type-C General Interface

Type-C universal interface for wide compatibility

The Type-C General Interface in the Solitaire PTK 7080 camera provides a versatile and efficient connection option. Type-C interfaces offer several advantages, including high-speed data transfer rates, reversible plug orientation for convenience, and compatibility. With this interface, users can easily connect the Solitaire PTK 7080 camera to their devices. The Type-C interface also supports features such as enhancing the camera's overall usability and connectivity.

USB Plug and Play

Standard USB, driver-free protocol, support mainstream OS, simple plug-n-play device

The standard USB drive protocol, which supports mainstream operating systems and offers plug-and-play functionality, ensures seamless compatibility and ease of use across different devices and platforms. This protocol allows USB drives to be recognized and accessed without the need for additional drivers or software installations. Whether you're using Windows, macOS, Linux, or other popular operating systems, USB drives adhering to this protocol can be inserted into USB ports.
